

Suggested Design Features*

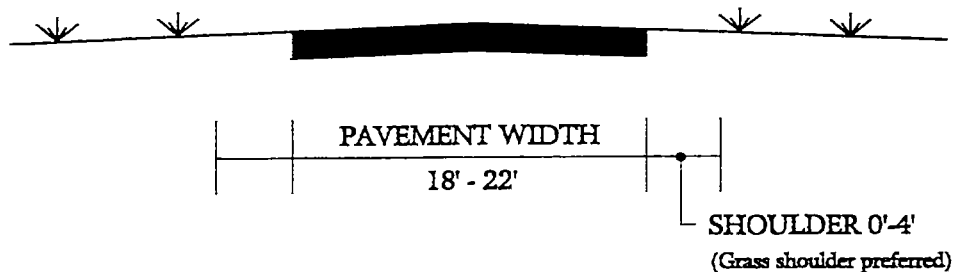

Figure 84

COUNTRY ARTERIAL

NOTES:

- 1) Width determined by design speed and traffic volume.
- 2) Drainage facilities to be constructed only if sheet flow creates problems and then to be custom designed to blend into countryside; infiltration should be first choice.

COUNTRY ROAD

NOTES:

- 1) Width determined by design speed and traffic volume.
- 2) Drainage facilities to be constructed only if sheet flow creates problems and then to be custom designed to blend into countryside; infiltration should be first choice.

* From AASHTO Policy on Roadway Design 1984.
