

# ARTICLE 59-5. FLOATING ZONE REQUIREMENTS

## Division 5.1. In General

### Section 5.1.1. Zone Categories

There are 4 categories of Floating zones:

- A. Residential Floating zones (Division 5.2);
- B. Commercial/Residential Floating zones (Division 5.3);
- C. Employment Floating zones (Division 5.4); and
- D. Industrial Floating zones (Division 5.5)

### Section 5.1.2. Intent Statement

The Residential Floating, Commercial/Residential Floating, Employment Floating, and Industrial Floating zones are intended to provide an alternative to development under the restrictions of the Euclidean zones mapped by Sectional Map Amendment (the Agricultural, Rural Residential, Residential, Commercial/Residential, Employment, Industrial, and Overlay zones). To obtain a Floating zone, an applicant must obtain approval of a Local Map Amendment under Section 7.2.1. The intent of the Floating zones is to:

- A. Implement comprehensive planning objectives by:
  - 1. furthering the goals of the general plan, applicable master plan, and functional master plans;
  - 2. ensuring that the proposed uses are in balance with and supported by the existing and planned infrastructure in the general plan, applicable master plan, functional master plan staging, and applicable public facilities requirements ; and
  - 3. allowing design flexibility to integrate development into circulation networks, land use patterns, and natural features within and connected to the property; and
- B. Encourage the appropriate use of land by:
  - 1. providing flexible applicability to respond to changing economic, demographic, and planning trends that occur between comprehensive District or Sectional Map Amendments;
  - 2. allowing various uses, building types, and densities as determined by a property's size and base zone to serve a diverse and evolving population; and

- 3. ensuring that development satisfies basic sustainability requirements including:
  - a. locational criteria,
  - b. connections to circulation networks,
  - c. density and use limitations,
  - d. open space standards,
  - e. environmental protection and mitigation; and
- C. Ensure protection of established neighborhoods by:
  - 1. establishing compatible relationships between new development and existing neighborhoods through limits on applicability, density, and uses;
  - 2. providing development standards and general compatibility standards to protect the character of adjacent neighborhoods; and
  - 3. allowing design flexibility to provide mitigation of any negative impacts found to be caused by the new use.

### Section 5.1.3. Applicability

- A. A Floating zone must not be approved for property that is in an Agricultural or Rural Residential zone.
- B. If a Floating zone is recommended in a master plan, there are no prerequisites for an application.
- C. If a Floating zone is not recommended in a master plan, the following apply:
  - 1. The maximum allowed density is based on the base zone and on the size of the tract as stated in Division 5.2 through Division 5.5. Any density bonus requested under Chapter 25A may be added to the density allowed under Division 5.2 through Division 5.5 and included in the units per acre or FAR of the zone requested.
  - 2. Residential Base Zone
    - a. When requesting a Residential Detached Floating (RDF) zone for a property with a Residential base zone:
