

“

Makeover Montgomery 4 is a great opportunity to learn about ways of making our communities more livable, inclusive and economically competitive, as well as healthier and smarter. This year's forum covers a vast range of innovative strategies for improving the suburbs.

Gwen Wright, Director  
Montgomery County Department of Planning

“

Every two years, Makeover Montgomery delivers on its promise to spark lively discussions about creative ways to transform the suburbs. This conference has grown into an important exchange of ideas among experts, academics and residents in the region.

Gerrit Knaap, Executive Director  
National Center for Smart Growth Research & Education

## MM4 Keynote Address and Plenary Sessions

### Keynote Address:

#### The Coming Reinvention of America

Peter Leyden | Wednesday, May 9. 7 p.m.

America is entering a period of fundamental reinvention on a scale seen only a handful of times in its history. Leyden makes the case that we're about to enter 10 to 20 years of explosive innovation across many fields. He lays out the changes to look for as we abandon many of the systems of the 20th century and rebuild systems that will work in the 21st. He explains the ramifications on the economy, society and civic life, as well as on all businesses and organizations. His positive story of how Americans will once again transform our way of life and lead the rest of the world leaves people of all political persuasions inspired.

### Plenary Sessions:

#### Making the Planning Process More Inclusive

Roger Lewis and Dan Reed | Thursday, May 10. 8:45 a.m.

Inclusivity in planning is more important than ever. Both the planning process and the plans that result need to be inclusive. Radio programs, such as those conducted Roger Lewis on planning and design topics (on the Kojó Nnamdi Show), Roger Lewis' columns and drawings in the Washington Post, and Dan Reed's blog posts on Just Up The Pike and Greater Greater Washington are all ways to engage people in thinking about planning and encourage involvement in planning processes. What more can and should be done to reach out?

#### Park Rx America: A Scalable Model for Prescribing Parks in the Clinical Setting

Dr. Robert Zarr | Friday, May 11. 12:15 p.m.

Dr. Robert Zarr will discuss his work as a national champion for getting people outdoors, including seven years as the spokesperson for the National Park Service on park prescriptions. As a pediatrician, he developed a method of linking data on parks and natural areas to electronic health records so a doctor can issue a prescription in the clinical setting. It is challenging to motivate people to spend time outdoors despite studies showing the benefits. Dr. Zarr will discuss how planners and developers can help make his job easier through sensible planning and good design.
