WHI Director Research and Codes - MNCBIA Codes Committee Chairman
Expanding Best Practices
Refer-Back Permitting
Remove Impediments Preventing Practical, Cost Effective, Energy Neutral Local Amendments to the Energy Code

• Recognize On and Off Site Generated Renewable Energy

• Recognize Building Air Tightness Tradeoffs

• Recognize More Efficient Appliances

• Opens up market choices which enables builders to provide consumers energy efficiency homes at the lowest possible cost and with the least possible number of unintended consequences
Just in case you were wondering—
“How do shortcomings in the model code’s occur?”

Code hearings with highly organized special interest pushing an agenda

Without highly organized special interest pushing an agenda
Problematic Unintended Consequences of an Inflexible Energy Code
