**2:00 pm – 4:00 pm**

**PRE-CONFERENCE PANEL ON THE FUTURE OF SUBURBS**

School of Architecture, Planning & Preservation Auditorium

- **Tim Chapin** Florida State University
- **Patrick Doherty** New America Foundation
- **Isabelle Gournay** University of Maryland
- **Galina Tachieva** DPZ and the Sprawl Repair Manual
- **Ronald Utt** The Heritage Foundation
- **Jim Cohen** University of Maryland

**Moderator**

**7:00 pm – 8:30 pm**

**OPENING KEYNOTE ADDRESS**

School of Architecture, Planning & Preservation Auditorium

The conference keynote address by USC demographer Dowell Myers will highlight demographic trends in suburbs across the United States. Laying the groundwork for the remainder of the conference, Myers will discuss the impact these trends could have on the future of America’s suburbs. His presentation will highlight the great demographic turning point that is expected to reshape suburban demand in the post-recession era. Immigrants and aging Baby Boomers are the two great drivers that make aggregate consumer preferences in the coming decade so very different from the past. Political expectations based on past trends have rarely been so poor a guide for future development. Myers will portray a potential new future, based on changing demographics, that is now coming into view. **CM 1.5**

- **Dowell Myers** University of Southern California

### Friday, April 15, 2011

**8:00 am – 8:30 am**

**LIGHT BREAKFAST AND REGISTRATION**

Atrium

**8:30 am – 9:00 am**

**WELCOME**

Great Hall

- **Richard E. Hall** Maryland Department of Planning
- **Hans Riemer** Montgomery County Council

**9:00 am – 10:30 am**

**SESSION #1A: SPRAWL REPAIR**

Great Hall

*Sprawl has come to define the urban form of the latter half of the 20th century and continues to be the dominant form of new development despite calls to shift to more sustainable development practices. This session provides an overview of planning tools and strategies that can be used to foster changes to this pattern and redirect growth to strategic areas identified for redevelopment. Strategies for a range of spatial scales will be offered and a major local case study will be highlighted. CM 1.5*

- **Evan Goldman** Federal Realty Investment Trust
  *The White Flint Sector Plan: Creating a New Downtown in Montgomery County*

- **Galina Tachieva** DPZ and the Sprawl Repair Manual
  *Sprawl Repair: A Comprehensive Method*

- **Emily Talen** Arizona State University
  *Sprawl Retrofit: Sustainable Urban Form in Unsustainable Places*

- **Sidney Brower** University of Maryland
  **Moderator**
SESSION #1B: TRANSPORTATION SUCCESSES AND CHALLENGES
Spring Room
Poorly connected transportation networks and a general lack of mode choices have combined to make automobile use and, increasingly, congestion ubiquitous in the suburbs. This session will highlight affordable fixes to the transportation system that may significantly change suburban travel choices and alleviate congestion. Presentations will highlight circulator bus systems, Bus Rapid Transit networks, and increasing connectivity of all modes of travel.

Moderator

10:45 am – 12:15 pm SESSION #2A: ZONING AND POLICY
Ellsworth Room
Fairly or unfairly, zoning and related public policies have been blamed for much of the sprawl of the latter half of the 20th century. This session considers opportunities to change zoning policies to create more sustainable communities. A diverse array of topics will be covered including the LEED®-ND system’s model zoning overlay, how to do planned retrofitting of new developments to make redevelopment easier, and how large community uses such as megachurches can be located and designed in more sustainable ways.

SESSION #2B: SUSTAINABILITY I
Spring Room
Sustainability, allowing the current generation to meet its needs without compromising the ability of future generations to do the same, is continuing to play a greater role in shaping planning policy. But is the notion of a sustainable suburb an oxymoron? In this first session on the topic, attendees will hear ideas on how LEED®-ND can address this question, how to implement sustainable solutions for the suburbs during an economic downturn, and empirical evidence on whether urban form really does encourage more physically active and greener forms of transportation.

SESSION #2C: CORRIDOR DEVELOPMENT
Great Hall
Arterial corridors lined with commercial shopping centers are a symbol of suburbia and also a prime target for many suburban redevelopment plans. But are these schemes realistic? Speakers will discuss the key challenges to redeveloping suburban corridors, from citizen opposition to design issues to market viability, and how they can be overcome. CM 1.5

We encourage you to visit one of the many fine establishments located throughout downtown Silver Spring, all within walking distance of the Silver Spring Civic Building.

1:30 pm – 3:00 pm SESSION #3A: INFILL DEVELOPMENT I
Great Hall
Infill development of townhomes and other dense housing types on small sites within established single-family neighborhoods is both a design and policy challenge. This session provides examples of how cities with as divergent planning perspectives as Portland, OR and Houston, TX have accommodated these forms of housing in close proximity to existing low-density units. Presentations will cover the design, policy approaches, and market demand for this form of redevelopment. CM 1.5

SESSION #3B: TOWN CENTER DEVELOPMENT
Spring Room
The mixed-use pedestrian-friendly town center has come to represent the new suburban alternative to “placeless” commercial suburban strip development. Speakers in this session will review the track record of this development type and offer recommendations on how to plan for their successful implementation both on greenfields and as part of major redevelopment schemes. SESSION #4A: INFILL DEVELOPMENT II
Great Hall
Large-scale infill projects in the suburbs offer the opportunity for transformative changes and serve as a catalyst for subsequent redevelopment. This session will focus on large-scale infill projects such as suburban high-rises and redevelopment of older garden apartment complexes. The market demand for these forms of infill development and their impact on regional affordable housing supply will be discussed.

SESSION #4B: SUSTAINABILITY II
Spring Room
This session builds on the first session on sustainability by exploring new models for retrofitting suburbia. Examples of sustainable suburban retrofitting will be offered from the East and West coasts. Research will be presented comparing how more sustainable mixed-use commercial districts have fared relative to more traditional suburban shopping centers and strip malls.

SESSION #5B: FINANCING TOOLS
Great Hall
The best suburban redevelopment plans may never be realized if market forces and developer profitability are not adequate. This session offers the development community’s perspectives on the opportunities and challenges experienced in redeveloping the suburbs. Case studies highlighting successful use of various financing tools will be offered. CM 1.5

10:45 am – 12:15 pm SESSION #6A: ZONING CODE REWRITE
Great Hall
This session presents a case study of suburban redevelopment planning in action. Montgomery County, MD, a largely suburban jurisdiction, is in the midst of a major zoning code rewrite that will encourage the redevelopment of appropriate parts of the county to meet market demands for new housing and achieve sustainability goals. Members of the County Zoning Advisory Panel and the County’s consulting firm CodeStudio will discuss the plan as it currently stands and the challenges they’ve faced along the way. CM 1.5

SESSION #6B: STATE REGULATIONS AND SUSTAINABLE INFRASTRUCTURE
Fenton Room
Some smart growth advocates say that current stormwater regulations and the Bay TMDL make achieving denser more sustainable urban forms more difficult and act as a disincentive to smart growth. This session will discuss the current stormwater regulations and the Bay TMDL in Maryland and what they mean for suburban redevelopment efforts in the state. Approaches capable of achieving both water resource and dense development goals will be discussed. CM 1.5

### 1:30 pm – 3:30 pm  
**POTENTIAL IMPACTS OF PROPOSED ZONING & BUILDING TYPOLOGIES**  
Great Hall  
Teams of graduate students from the University of Maryland will present detailed, illustrated analyses and comparisons of the redevelopment potential for sites in Montgomery County, Maryland under two scenarios: the existing zoning-by-right and the proposed zoning code rewrite. The focus will be on the relationship between the existing neighborhood, the scale and character of the new development and the financial pro-forma for the site. These design studies will further examine historical context; social context; density; morphological analysis of city plan, city fabric and building type(s); type(s) analysis (function, size, program, etc.); value; market type; and demographics.
