MONTGOMERY COUNTY HISTORIC PRESERVATION COMMISSION
STAFF REPORT

Address: 315 Ashton-Sandy Springs Rd., Ashton
Meeting Date: 09/06/17

Resource: Tanglewood
Individually Listed Master Plan Site
Report Date: 08/30/17

Applicant: Darel Coutts
Public Notice: 08/2317

Review: HAWP
Tax Credit: yes

Case Number: 15/37-17A
Staff: Dan Bruechert

Proposal: Porch Restoration

STAFF RECOMMENDATION
Staff recommends that the HPC approve the HAWP application.

PROJECT DESCRIPTION
SIGNIFICANCE: Master Plan for Historic Preservation Site
STYLE: Gothic Revival
DATE: 1871

The house is a two-and-a-half story, clapboard, Gothic Revival house, four bays wide with a cross gable roof. The historic porch was removed some time after 2007.

From *Places from the Past*:
The attractive and spacious residence known as Tanglewood was the home of community leader Alban Gilpin Thomas and hostess Susannah Leggett Thomas. At the time of their marriage, in 1871, the Thomases built the house and continued to expand and improve it over several decades. A storekeeper in Ashton since the 1860s, Alban became the community’s first postmaster in 1884, opening a section of his store to accommodate the post office, as was the custom. He was president of the Sandy Spring Bank, and organized Citizens National Bank in Laurel. After 1928, Frederick Thomas lived at Tanglewood with his family and succeed his father Alban as a bank president. A striking aspect of the Tanglewood property is its outstanding collection of outbuildings, including a brick smokehouse, Gothic Revival corncrib, board and batten work shed. On the main house, a second story addition was built in 1987 over an enclosed side porch. Ownership by the Thomas family descendants has continued into the 20th century.

PROPOSAL
The applicant is proposing to reconstruct the original front porch using photo documentation and building investigation.
APPLICABLE GUIDELINES
When reviewing alterations and additions to a Master Plan site several documents are to be utilized and guidelines to assist the Commission in developing their decision. These documents include Montgomery County Code chapter 24A (Chapter 24A) and the Secretary of the Interior's Standards for Rehabilitation (Standards) and can be guided by the details in the Design Guidelines for Historic Sites and Districts in Montgomery County, Maryland (Design Guidelines). The pertinent information in these documents is outlined below.

Secretary of the Interior's Standards for Rehabilitation

2. The historic character of a property will be retained and preserved. The removal of distinctive materials or alteration of features, space and spatial relationships that characterize a property will be avoided.

3. Each property shall be recognized as a physical record of its time, place and use. Changes to a property that has acquired historic significance in their own right will be retained and preserved.

5. Distinctive materials, features, finishes and construction techniques or examples of craftsmanship that characterize a property will be preserved.

6. Deteriorated historic features will be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive feature, the new feature will match the old in design, color, texture, and, where possible, materials. Replacement of missing features will be substantiated by documentary and physical evidence.

Montgomery County Code; Chapter 24A-8(b)
A HAWP permit should be issued if the Commission finds that:

1. The proposal will not substantially alter the exterior features of a historic site or historic resource within a historic district.

2. The proposal is compatible in character and nature with the historical archaeological, architectural or cultural features of the historic site or the historic district in which a historic resource is located and would not be detrimental thereto to the achievement of the purposes of this chapter.

3. The proposal would enhance or aid in the protection, preservation and public or private utilization of the historic site or historic resource located within an historic district in a manner compatible with the historical, archeological, architectural or cultural value of the historic site or historic district in which an historic resource is located; or

STAFF DISCUSSION
The applicant’s proposal will recreate the appearance of the front porch to its 1898 appearance. The size, shape, details, and materials for this era have been determined based on a family photograph from that era and from architectural investigation.

Based on photo-documentation, the front porch of the house was removed sometime after 2007 and the house currently has a concrete front porch and flagstone stairs.

The applicant is proposing to recreate the front porch using documentation and the historic
details from a historic bay window. The square columns, dentils, and cornice will match the appearance of this lost distinctive feature. The flat-roof porch will be supported by two set of paired, wood, square columns. A thin, steel hand rail will be installed into the existing flagstone stairs. The open hand rail will have a minimal appearance that will not detract from the appearance of the new porch (see: 24A-8(b)(2)). As the applicant has relied on the photographic and architectural investigation, the replication of the element is supported by Standard 6. Staff supports approval of this project.

**STAFF RECOMMENDATION**
Staff recommends the HPC **approve** the HAWP application;

and with the general condition applicable to all Historic Area Work Permits that the applicant **will present 3 permit sets of drawings to HPC staff for review and stamping prior to submission for permits** (if applicable). After issuance of the Montgomery County Department of Permitting Services (DPS) permit, the applicant will arrange for a field inspection by calling the DPS Field Services Office at 240-777-6370 prior to commencement of work **and** not more than two weeks following completion of work.

THE FOLLOWING ITEMS MUST BE COMPLETED AND THE REQUIRED DOCUMENTS MUST ACCOMPANY THIS APPLICATION.

1. WRITTEN DESCRIPTION OF PROJECT
   a. Description of existing structure(s) and environmental setting, including their historical features and significance:

   The home known as Tanglewood (Master Plan Site #15/37) was built in 1871 and owned by the Thomas family (notable local citizens) until the 21st century. It is a 2-1/2 story wood framed Gothic Revival house, 4 bays wide with a cross-gabled roof. The property is partially wooded and includes a corncrib, shed/garage, smokehouse, and other minor structures. The original house and historic rear addition is mostly intact. In the previous decades the original front porch roof was removed when it began to collapse from rot and replaced with open beams. The porch floor structure was replaced at some point as were the steps which were replaced with concrete (treads and risers clad in flagstone). The previous owner modified the enclosed side porch and removed the remaining columns and beam structure of the front porch so only a deck remains.

   b. General description of project and its effect on the historic resource(s), the environmental setting, and, where applicable, the historic district:

   This HAWP is for the purpose of recreating the original front porch (deck, columns, and roof) to the greatest extent possible according to historic photographs and investigation. The bay window on the north elevation retains the original details of the dentil moulding frieze and crown which matched the front porch and is the basis for the reconstructed roof. The exposed concrete portions of the non-historic steps are to be clad in stone to match the adjacent landscape walls. A pair of handrails on wood posts are to be added to either side of the steps to meet code (four or more risers require a handrail on at least one side per IRC 2015 R311.7.8)

2. SITE PLAN
   Site and environmental setting, drawn to scale. You may use your plat. Your site plan must include:
   a. the scale, north arrow, and date;
   b. dimensions of all existing and proposed structures, and
   c. site features such as walkways, driveways, fences, ponds, streams, trash dumpsters, mechanical equipment, and landscaping.

3. PLANS AND ELEVATIONS
   You must submit 2 copies of plans and elevations in a format no larger than 11" x 17". Plans on 8 1/2" x 11" paper are preferred.
   a. Schematic construction plans, with marked dimensions, indicating location, size and general type of walls, window and door openings, and other fixed features of both the existing resource(s) and the proposed work.

   b. Elevations (facades), with marked dimensions, clearly indicating proposed work in relation to existing construction and, when appropriate, context. All materials and fixtures proposed for the exterior must be noted on the elevations drawings. An existing and a proposed elevation drawing of each facade affected by the proposed work is required.

4. MATERIALS SPECIFICATIONS
   General description of materials and manufactured items proposed for incorporation in the work of the project. This information may be included on your design drawings.

5. PHOTOGRAPHS
   a. Clearly labeled photographic prints of each facade of existing resource, including details of the affected portions. All labels should be placed on the front of photographs.

   b. Clearly label photographic prints of the resource as viewed from the public right-of-way and of the adjoining properties. All labels should be placed on the front of photographs.

6. TREE SURVEY
   If you are proposing construction adjacent to or within the drip line of any tree 6" or larger in diameter (at approximately 4 feet above the ground), you must file an accurate tree survey identifying the size, location, and species of each tree of at least that dimension.

7. ADDRESSES OF ADJACENT AND CONFRONTING PROPERTY OWNERS
   For ALL projects, provide an accurate list of adjacent and confronting property owners (not tenants), including names, addresses, and zip codes. This list should include the owners of all lots or parcels which adjoin the parcel in question, as well as the owner(s) of lot(s) or parcel(s) which lie directly across the street/highway from the parcel in question.

PLEASE PRINT (IN BLUE OR BLACK INK) OR TYPE THIS INFORMATION ON THE FOLLOWING PAGE. PLEASE STAY WITHIN THE GUIDES OF THE TEMPLATE, AS THIS WILL BE PHOTOCOPIED DIRECTLY ONTO MAILING LABELS.

HISTORIC AREA WORK PERMIT

JULY 26, 2017
NO. 131  E-10  ALBAN G. THOMAS  1871
FRAME

Old Homes and History of Montgomery County, 1952, Farquhar

Photograph from early twentieth century showing the porch painted white and an awning spanning between the outer columns.

"Courtesy the Farquhar Family", Sandy Spring Legacy, 1999, Sandy Spring Museum

Photograph from 1898 showing the Thomases in front of Tanglewood. The paired square columns are distinct and the dentil course in the frieze is barely visible through the dark paint.
Photographs from the mid-twentieth century showing the correspondence of the south porch roof to that of the protruding window bay on the west elevation. The projection of the crown and the size of the frieze moulding match between the two.
Photographs from prior to 2007 showing the largely original porch with visible weathering on the east edge. The southeast column has been removed and replaced by a simple post and the roof had been rebuilt and a downspout added in the center of the east elevation.

Photographs from 2007 showing clearly degraded roof and overhang and the location of the single downspout at the southeast post.
Photograph from post-2007 showing the porch removed with the profile visible on the original siding.

Photographs from post-2007 showing the porch reconstructed without a roof. The original columns are used however the original crown and dentil moulding have been replaced.
Photograph from 2017 showing the current condition. No evidence remains of the previous porch.

Photograph from 2017 showing the west elevation featuring a protruding bay window which retains the original trim.

Detail of the west bay window showing original dentil moulding frieze. The overhang with crown moulding has been heavily repaired but appears to retain the original projection and roof details.
Photograph from 2017 showing the east elevation featuring the 2014 extension.
