PROPOSAL: Site wall and fence installation

STAFF RECOMMENDATION:

Staff recommends that the HPC **approve with one (1) condition** the HAWP application.

1. The applicants will adhere to any conditions that the Commission stipulates to mitigate the proposal’s impact to the subject property and surrounding streetscape.

ARCHITECTURAL DESCRIPTION

SIGNIFICANCE: Individually Designated Master Plan Site (35/014-005A)
STYLE: Classical Revival
DATE: Circa 1938

Excerpt from *Places from the Past*:

The Bethesda Post Office is one of three county post offices built under the Works Progress Administration. The program sought to create buildings that fit in with a community's architecture. The Bethesda Post Office is built of native Stoneyhurst stone found on other structures in the Bethesda Commercial District. The Classical Revival building, featuring a hipped roof, distinctive cupola and segmentally-arched windows, was designed by Karl O. Sonnemann (1900-1967). Sonnemann was architect for the Federal Works Agency and its successor, the General Services Administration, from 1925 until his retirement in 1964. The builders were the Sofarelli Brothers of Jamaica, New York. An interior mural by Robert Gates depicts rural Montgomery County. The WPA commissioned Gates to paint murals for several of its projects in this era. Gates became one of Washington’s most respected and influential artists.

BACKGROUND:

The applicants previously appeared before the Commission with a proposal for a rear addition and other alterations. The proposal was heard as a preliminary consultation at the December 3, 2014 HPC meeting, and the HAWP application was approved at the January 14, 2015 HPC meeting.
PROPOSAL:

- Retroactive construction of a 7'-2" to 7'-9" tall concrete site wall at the rear and Montgomery Lane side of the existing rear parking lot.
- Retroactive construction of a 7'-2" to 7'-9" tall horizontal slat fence, connecting the rear left corner of the historic building to the concrete site wall.
- Retroactive construction of an 8' tall chain link fence with artificial plant screening on the roof of the previously approved rear addition.

APPLICABLE GUIDELINES:

In accordance with section 1.5 of the Historic Preservation Commission Rules, Guidelines, and Procedures (Regulation No. 27-97) (Regulations), the Commission in developing its decision when reviewing a Historic Area Work Permit Application for an undertaking at a resource in the Chevy Chase Village Historic District uses section 24A-8 of the Montgomery County Code ("Chapter 24A"), the Secretary of the Interior's Standards and Guidelines for Rehabilitation (Standards), and pertinent guidance in applicable master plans – Chevy Chase Village Historic District Design Guidelines. [Note: where guidance in an applicable master plan is inconsistent with the Standards, the master plan guidance shall take precedence (§ 1.5(b) of the Regulations).] The pertinent information in these documents, incorporated in their entirety by reference herein, is outlined below.

Sec. 24A-8. Same-Criteria for issuance.

(a) The commission shall instruct the director to deny a permit if it finds, based on the evidence and information presented to or before the commission that the alteration for which the permit is sought would be inappropriate, inconsistent with or detrimental to the preservation, enhancement or ultimate protection of the historic site or historic resource within an historic district, and to the purposes of this chapter.

(b) The commission shall instruct the director to issue a permit, or issue a permit subject to such conditions as are found to be necessary to insure conformity with the purposes and requirements of this chapter, if it finds that:

1. The proposal will not substantially alter the exterior features of an historic site or historic resource within an historic district; or
2. The proposal is compatible in character and nature with the historical, archeological, architectural or cultural features of the historic site or the historic district in which an historic resource is located and would not be detrimental thereto or to the achievement of the purposes of this chapter; or
3. The proposal would enhance or aid in the protection, preservation and public or private utilization of the historic site or historic resource located within an historic district in a manner compatible with the historical, archeological, architectural or cultural value of the historic site or historic district in which an historic resource is located; or
4. The proposal is necessary in order that unsafe conditions or health hazards be remedied; or
5. The proposal is necessary in order that the owner of the subject property not be deprived of reasonable use of the property or suffer undue hardship; [emphasis added] or
6. In balancing the interests of the public in preserving the historic site or historic resource located within an historic district, with the interests of the public from the use and benefit of the alternative proposal, the general public welfare is better served by granting the permit.

(c) It is not the intent of this chapter to limit new construction, alteration or repairs to any 1 period or architectural style.

(d) In the case of an application for work on an historic resource located within an historic district, the commission shall be lenient in its judgment of plans for structures of little historical or design
significance or for plans involving new construction, unless such plans would seriously impair the historic or architectural value of surrounding historic resources or would impair the character of the historic district. (Ord No. 94-§1; Ord No. 11-59)

Secretary of Interior's Standards for Rehabilitation

The Secretary of the Interior defines rehabilitation as “the act or process of making possible a compatible use for a property through repair, alterations, and additions while preserving those portions or features, which convey its historical, cultural, or architectural values.” Standards 2, 5, and 6 most directly apply to the application before the commission:

1. A property shall be used for its historic purpose or be placed in a new use that requires minimal change to the defining characteristics of the building and its site and environment.

2. The historic character of a property shall be retained and preserved. The removal of historic materials or alteration of features and spaces that characterize a property shall be avoided.

3. Each property shall be recognized as a physical record of its time, place, and use. Changes that create a false sense of historical development, such as adding conjectural features or architectural elements from other buildings, shall not be undertaken.

4. Most properties change over time; those changes that have acquired historic significance in their own right shall be retained and preserved.

5. Distinctive features, finishes, and construction techniques or examples of craftsmanship that characterize a historic property shall be preserved.

6. Deteriorated historic features shall be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive feature, the new feature shall match the old in design, color, texture, and other visual qualities and, where possible, materials. Replacement of missing features shall be substantiated by documentary, physical, or pictorial evidence.

7. Chemical or physical treatments, such as sandblasting, that cause damage to historic materials shall not be used. The surface cleaning of structures, if appropriate, shall be undertaken using the gentlest means possible.

8. Significant archaeological resources affected by a project shall be protected and preserved. If such resources must be disturbed, mitigation measures shall be undertaken.

9. New additions, exterior alterations, or related new construction shall not destroy historic materials that characterize the property. The new work shall be differentiated from the old and shall be compatible with the massing, size, scale, and architectural features to protect the historic integrity of the property and its environment.

10. New additions and adjacent or related new construction shall be undertaken in such a manner that if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.
STAFF DISCUSSION:

As noted in the excerpt from Places from the Past, the subject property is one of three county post offices built under the Works Progress Administration. The building, which dates to circa 1938, is designed in the Classical Revival style, with many of its character defining and distinctive features visible from the public right-of-way of Wisconsin Avenue (front) and Montgomery Lane (left side and rear).

The applicants previously appeared before the Commission with a proposal for a rear addition and other alterations. The proposal was heard as a preliminary consultation at the December 3, 2014 HPC meeting, and the HAWP application was approved at the January 14, 2015 HPC meeting. The previous proposal included repaving the existing rear parking lot and replacing the metal pipe fencing at the rear and Montgomery Lane side of the parking lot with cable rail fencing. Evergreen planters were also proposed to line the perimeter of the site.

The applicants have constructed a concrete site wall where the cable rail fencing was previously proposed. The concrete site wall ranges from 7’-2” to 7’-9” tall and is on top of an existing retaining wall, which is approximately 4’ tall. The overall perceived height of the wall from Montgomery Lane is approximately 12’. A horizontal slat fence of equal height to the concrete site wall has also been constructed, connecting the rear left corner of the historic building to the concrete site wall. The previously approved evergreen planters have been installed at the Montgomery Lane side of the parking lot in front of the site wall.

A chain link fence with artificial plant screening has been constructed on the roof of the previously approved rear addition. The fence, which was not part of the previous approval, is 8’ tall.

The Commission’s unadopted policy for fences and site walls at historic sites and within historic districts is as follows: fences and site walls forward of the rear plane of a historic structure must not exceed 4’ in height and must have an open appearance (i.e. fences should have a picket or similar design, and site walls should be low in height and step to follow the site’s topography) to preserve visibility of the property from the public right-of-way; and fences and site walls behind the rear plane of a historic structure must not exceed 6’-6” in height. It is staff’s understanding that these limitations are consistent with the height requirements for site walls and fences at all locations within Montgomery County, as established by county code. If so, the concrete site wall and horizontal slat fence may not be code compliant.

Typically, the Commission approves fences and site walls with a solid appearance behind the rear plane of a historic structure, although special consideration is given for properties on corner lots, where such a feature would obscure character-defining features of the historic site or otherwise detract from the surrounding streetscape.

Although the chain link fence with artificial plant screening on the roof of the rear addition is not consistent with the Commission’s policy – and staff is concerned that the fence was constructed without a HAWP – staff is not greatly concerned about its potential to detract from character-defining features of the historic site, due to its location on the roof of a rear addition; however, staff is concerned about the concrete site wall and horizontal slat fence, which at least partially obscure the rear elevation of the historic building and prevent its character-defining features from being experienced from Montgomery Lane.

Because this is a retroactive HAWP application and the concrete site wall and horizontal slat fence have already been constructed, staff recommends that the HPC approve the HAWP application; however, staff does recommend that the HPC hear this case and stipulate any conditions of approval that they find
necessary to mitigate the proposal's impact to the historic site. Such conditions should ensure that the proposal does not detract from the character-defining features of the historic site and might include modification or removal of features that have already been constructed.

After full and fair consideration of the applicant's submission staff finds the proposal as being consistent with the Criteria for Issuance in Chapter 24A-(b) 1 and 2, having found the proposal is consistent with the *Secretary of the Interior's Standards for Rehabilitation* outlined above.

**STAFF RECOMMENDATION**

Staff recommends that the Commission **approve with the condition specified on Circle 1** the HAWP application under the Criteria for Issuance in Chapter 24A-8(b), having found that the proposal will not substantially alter the exterior features of the historic resource and is compatible in character with the district and the purposes of Chapter 24A;

and with the *Secretary of the Interior’s Standards for Rehabilitation*;

and with the general condition that the applicant shall present the **3 permit sets of drawings, if applicable to Historic Preservation Commission (HPC) staff for review and stamping** prior to submission for the Montgomery County Department of Permitting Services (DPS) building permits;

and with the general condition that final project design details, not specifically delineated by the Commission, shall be approved by HPC staff or brought back to the Commission as a revised HAWP application at staff's discretion;

and with the general condition that the applicant shall notify the Historic Preservation Staff if they propose to make **any alterations** to the approved plans. Once the work is completed the applicant will contact the staff person assigned to this application at 301-563-3400 or michael.kyne@montgomeryplanning.org to schedule a follow-up site visit.
APPLICATION FOR
HISTORIC AREA WORK PERMIT

Disapproved: ________________________________

Applications/Permit No.: ________________________________ Date Filed: ________________________________ Date Issued: ________________________________

SEE REVERSE SIDE FOR INSTRUCTIONS
THE FOLLOWING ITEMS MUST BE COMPLETED AND THE
REQUIRED DOCUMENTS MUST ACCOMPANY THIS APPLICATION.

1. WRITTEN DESCRIPTION OF PROJECT
   a. Description of existing structure(s) and environmental setting, including their historical features and significance:

   The existing structure is the Old Post Office located downtown Bethesda, which is undergoing a major renovation and expansion project. The main portion of the property (the old post office) is considered historic, while the portion of the property that was formerly a parking lot for USPS was deemed to have no historic value.

   b. General description of project and its effect on the historic resource(s), the environmental setting, and, where applicable, the historic district:

   The subject of this application is a retroactive approval of several exterior changes that had not been previously presented to the Commission. The attached drawings reflect construction in “as built” form. Two changes of interest include (1) raising the original concrete retaining wall along Montgomery Ln and (2) adding an artificial plant fence screen on the roof of the new addition. The retaining wall that surrounds the old parking lot was raised to varying heights ranging from 4’ to 7’ to add privacy to an outdoor workout space. It does not hinder historic views of the building from the south or east (most significant). The artificial plant fence screen creates a rooftop oasis, and would not appear to have any impact on the original historic structure.

2. SITE PLAN
   Site and environmental setting, drawn to scale. You may use your plat. Your site plan must include:
   a. the scale, north arrow, and data;
   b. dimensions of all existing and proposed structures; and
   c. site features such as walkways, driveways, fences, ponds, streams, trash dumpsters, mechanical equipment, and landscaping.

3. PLANS AND ELEVATIONS
   You must submit 2 copies of all plans and elevations in a format no larger than 11" x 17". Plans on 8 1/2" x 11" paper are preferred.
   a. Schematic construction phase, with marked dimensions, indicating location, size and general type of walls, window and door openings, and other significant features of both the existing resource(s) and the proposed work.
   b. Elevations (facades), with marked dimensions, clearly indicating proposed work in relation to existing construction and, when appropriate, contact. All materials and features proposed for the exterior must be noted on the elevation drawings. An existing and a proposed elevation drawing of each facade affected by the proposed work is required.

4. MATERIALS SPECIFICATIONS
   General description of materials and manufactured items proposed for incorporation in the work of the project. This information may be included on your design drawings.

5. PHOTOGRAPHS
   a. Clearly labeled photographic prints of each facade of existing resource, including details of the affected portions. All labels should be placed on the front of photographs.
   b. Clearly label photographic prints of the resource as viewed from the public right-of-way and of the adjoining properties. All labels should be placed on the front of photographs.

6. TREE SURVEY
   If you are proposing construction adjacent to or within the dripline of any tree 6” or larger in diameter (at approximately 4 feet above the ground), you must file an accurate tree survey identifying the size, location, and species of each tree at least that dimension.

7. ADDRESSES OF ADJACENT AND CONFLICTING PROPERTY OWNERS
   For ALL projects, provide an accurate list of adjacent and conflicting property owners (not tenants), including names, addresses, and zip codes. This list should include the owners of all lots or parcels which adjoin the parcel in question, as well as the owner(s) of lot(s) or parcel(s) which lie directly across the street/highway from the parcel in question.

PLEASE PRINT IN BLUE OR BLACK INK OR TYPE THIS INFORMATION ON THE FOLLOWING PAGE.
PLEASE STAY WITHIN THE GUIDES OF THE TEMPLATE, AS THIS WILL BE PHOTOCOPIED DIRECTLY ONTO MAILING LABELS.

Application for Historic Area Work Permit and Written Description of Project

Written Description of Project

Description of existing structure and environmental setting, including the historical features and significance:

The post office located in the area now known as the Bethesda Central Business District, originally called Darcy's Store, was a small community surrounded by farms around the Civil War era. Constructed in 1938 by the Soferelli Brothers of Jamaica, New York, the single story, native stone and stucco building is neo-colonial in design and features a hipped roof with cupola and arched windows. The historic existing building material include a slate roof and wood cornice, stone and granite exterior, and granite steps at the front entrance.

It is one of a limited number of public buildings in the County constructed under the auspices of the Work Progress Administration (WPA). As a representative example of WPA construction, the building provides a physical link for the County and this period in American history.

The amendment recognizes that the Post Office, because of its scale, prominent location, and distinctive building material, has emerged as a landmark along Wisconsin Avenue. The amendment therefore designates the site's entire 13,211 sq. ft. parcel as the environmental setting.

General description of project and its effect on the historic resource(s), the environmental setting, and where applicable, the historic district:

The existing historic stone clad building includes an existing asphalt rear parking area and non-historic loading dock. The proposed renovation will not affect the existing historic building. The existing historic windows and wood trim will be repaired and repainted. The existing railings and railings will be re-

The new addition and construction will be located behind the historic building in the parking, and loading dock area. The proposed design will include transforming the loading dock to interior conditioned space, and will beautify the rear of the building. The new 800 SF addition to the loading dock will be used as an extension to the yoga studio and will include a small juice bar, open to the public and members of the yoga studio. The new addition includes a glass stair tower and an elevator to access the roof and lower level, as well as to visually separate the historic building from the new addition.

The parking area will be repaved with exposed aggregate and will be lined with evergreen planters alongside the perimeter and new cable railings replacing the existing pipe rails.

Monument signage will be added to the rear of the building and to the front, so as not to affect the historic building facade. The existing flagpole will be utilized.
