Preliminary Consultation
MONTGOMERY COUNTY HISTORIC PRESERVATION COMMISSION
STAFF REPORT

Address: 10500 & 10520 St. Paul St., Kensington  
Resource: Primary Resource  
Kensington Historic District  
Applicant: McCaffery Interests  
Review: Preliminary Review  
Proposal: New Construction and Building Rehabilitation

Meeting Date: 3/14/18  
Report Date: 3/7/18  
Public Notice: 2/28/17  
Staff: Dan Bruechert

RECOMMENDATION

Staff recommends that applicant revise their design based on the feedback provided by the HPC and return for either a second preliminary consultation or for a Historic Area Work Permit.

PROPERTY DESCRIPTION

SIGNIFICANCE: Primary resource to the Kensington Historic District
STYLE: Folk Victorian & Commercial.
DATE: c. 1930

The property evaluated for this Preliminary Consultation consists of two historic buildings that have been combined to operate as a single business. The left building is a Folk Victorian with a steeply pitched front gable roof, clapboard siding, three bays wide, with a full-width hipped front porch and a small window in the gable that has been boarded up.

The building on the right is a early 20th-century roadside commercial building, oriented for its high visibility along both St. Paul and Metropolitan Ave. with an asphalt shingled T-shaped gable roof. The Metropolitan Ave. façade has a side gable roof and with the principal entrance to the left and a large divided lite storefront window. The St. Paul façade has a divided lite storefront window to the right, with a pair of casement windows an entrance door, and a vehicle door to the left.

Sometime in the late 20th-century the two buildings were added on to and combined to operate as a single building. The connectors are frame construction with clapboard siding.

PROPOSAL

The applicant proposes rehabilitate the two historic buildings, to construct a five-story senior housing complex to the rear of the two historic buildings (immediately outside of the historic district, see Fig. 1 below), and create a new connection between the historic buildings and to the
new construction.

Figure 1: The proposed building site. The eastern (left) portion of the lot is within the Kensington Historic District.

**APPLICABLE GUIDELINES**

**Kensington Historic District Guidelines**

When reviewing alterations and new construction within the Kensington Historic District several documents are to be utilized as guidelines to assist the Commission in developing their decision. These documents include the Approved & Adopted Amendment to the Master Plan for Historic Preservation: Kensington Historic District, Atlas #31/6 (Amendment), Vision of Kensington: A Long-Range Preservation Plan (Vision), Montgomery County Code Chapter 24A (Chapter 24A), and the Secretary of the Interior's Standards for Rehabilitation (Standards). The pertinent information in these documents is outlined below.

**Vision of Kensington: A Long-Range Preservation Plan**

The HPC formally adopted the planning study, Vision of Kensington: A Long-Range Preservation Plan, and is directed by the Executive Regulations, which were approved by the County Council, to use this plan when considering changes and alterations to the Kensington Historic District. The goal of this preservation plan "was to establish a sound database of information from, which to produce a document that would serve the HPC, M-NCPCC, their staff and the community in wrestling with the protection of historic districts amidst the pressures of life in the 21st century." (page 1). The plan provides a specific physical description of the district as it is; an analysis of character-defining features of the district; a discussion of the challenges facing the district; and a discussion of proposed strategies for maintaining the
character of the district while allowing for appropriate growth and change.

The Vision identifies the following, as those features that help define the character of Kensington's built environment:

- Building Setbacks: Residential and Commercial Patterns
- Rhythm of Spacing between Buildings
- Geographic and Landscape Features
- Scale and Building Height
- Directional Expression of Building
- Roof Forms and Material
- Porches
- Dominant Building Material
- Outbuildings
- Integrity of Form, Building Condition, and Threats
- Architectural Style

The Amendment notes that:
The district is architecturally significant as a collection of late 19th and early 20th century houses exhibit a variety of architectural styles popular during the Victorian period including Queen Anne, Shingle, Eastlake, and Colonial Revival. The houses share a uniformity of scale, setbacks, and construction materials that contribute to the cohesiveness of the district's streetscapes. This uniformity, coupled with the dominant design inherent in Warner's original plan of subdivision, conveys a strong sense of both time and place, that of a Victorian garden suburb.

Secretary of the Interior's Standards for Rehabilitation:
2. The historic character of a property will be retained and preserved. The removal of distinctive materials or alteration of features, space and spatial relationships that characterize a property will be avoided.

6. Deteriorated historic features will be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive feature, the new feature will match the old in design, color, texture, and, where possible, materials. Replacement of missing features will be substantiated by documentary and physical evidence.

9. New additions, exterior alterations, or related new construction will not destroy historic materials, features, and spatial relationships that characterize the property. The new work shall be differentiated from the old and will be compatible with the historic materials, features, size, scale and proportions, and massing to protect the integrity of the property and its environment.

10. New additions and adjacent or related new construction will be undertaken in such a manner that, if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.
STAFF DISCUSSION

The applicant is proposed to demolish the non-historic additions to the rear, rehabilitate the two subject buildings, create a new interior connection, and integrate them with the larger proposed five-story senior housing facility.

Demolition of Non-Historic Additions
Staff finds the proposal to remove the non-historic additions should be approved when this proposal is at the Historic Area Work Permit (HAWP) stage. They do not contribute to the historic character of the buildings or surrounding district.

Building Rehabilitation
The applicant proposes to utilize the two historic buildings as part of the new development. Staff finds that the work the applicant is proposing for the two historic buildings focuses on the repair and retention of the historic fabric (i.e. retention of windows and doors, clapboard replacement as needed). Where features are too deteriorated to be repaired, the applicant proposes to replace them in-kind; as is case with the asphalt shingled roof. This work appears to meet Standards 2 and 6.

New Hyphen/Connector
After demolishing the non-historic additions, the applicant proposes new construction between the two historic buildings and the proposed new construction. The connector will allow for the creation of new interior space to be utilized as part of the new senior housing and to control access to these other locations. The connector will provide access between both historic buildings and to the new five-story building. The proposed connector is one story construction with large glass windows in a contemporary storefront configuration. This feature will be highly visible from both the north and east facades. The drawings show an opaque material covering the columns and frieze, however, that material was not identified in the application materials. Staff finds the size and scale of this proposal to be generally appropriate (per Standard 9), however, Staff believes that opaque material should relate to material found either on the historic buildings or to the proposed new construction.
While HPC review does not typically review changes to the interior of buildings, in this instance Staff believes HPC review is appropriate because the applicant is proposing to convert historic exterior walls into interior space. Additionally, substantial portions of these newly created interior walls will be visible from the public right-of-way through the connector's large windows. Based on Staff's interpretation of the proposed site plan Staff finds that the proposed amount of wall retention appropriate, however, Staff also believes the HPC could allow the applicant to open some of these newly created interior spaces while still meeting Standards 2, 9, and 10.

**Historic Sign**
The historic free-standing, concrete sign (with the original Texico logo) still exist on site. The sign historically was externally illuminated by lap lights projecting out of the top of the sign. The submitted site plan shows the sign still on the site, however, it does not detail the proposed treatment for the sign. Staff believes that this sign should stay and would like the HPC’s input regarding the treatment of this historic feature with regards to signage for a new business (i.e. appropriate material for infill sign, lighting, etc.).

**Sitework**
The applicant proposes to construct a five-story senior housing building to the rear of the historic buildings. The applicant has provided renderings of this proposed new construction to the HPC. The lower levels of the new building will be clad in brick with some type of structural panel for the upper floors. The massing of the building is broken up by three, interspersed, front-facing gables with flat roofs and recessed balconies in the corners. This building is outside the historic district, however, as the current proposal calls for connecting the new construction to the historic buildings Planning Staff has asked the HPC to provide feedback regarding the design and its impact on the surrounding district. Planning Staff has asked the HPC to provide feedback on the relationship between the proposed building and associated hardscaping/landscaping to the
adjacent historic buildings and surrounding district.

Staff has developed several questions for the HPC regarding the proposed rehabilitation of 10500 and 10520 St. Paul St. and the proposed new development:

Proposed Connection
- Is it appropriate under the required guidance to connect these historic buildings to one another?
- Is it appropriate to connect these two historic buildings to the proposed five-story construction?

Design and Materials
- *(If the HPC finds the connector acceptable)* How much of the exterior structure must be retained in the newly created interior space?
- Is the design for the hyphen/connector appropriate? And if so/not, what changes does the HPC recommend?
  - Spandrel material? Etc.

Site and Surrounding District
- The applicant proposes to have food service provided at the building at the corner of Metropolitan Ave. and St. Paul St. Is there a preferred method of demarcating this area or is it preferable to leave this corner more open?
- Does the proposed rehab and new construction maintain the character of Kensington?
- Does the HPC have a preferred treatment for the hardscaping between the street and the building front (both the St. Paul St. and Metropolitan Ave. elevations)?
- Are there additional concerns regarding parking, ADA compliance, or public transportation that will have an impact on the historic buildings?

**STAFF RECOMMENDATIONS**

Staff recommends that applicant revise their design based on the feedback provided by the HPC and return for either a second preliminary consultation or for a Historic Area Work Permit.

SEE REVERSE SIDE FOR INSTRUCTIONS
THE FOLLOWING ITEMS MUST BE COMPLETED AND THE REQUIRED DOCUMENTS MUST ACCOMPANY THIS APPLICATION.

1. WRITTEN DESCRIPTION OF PROJECT
   a. Description of existing structure(s) and environmental setting, including their historical features and significance:

   TWO HISTORIC BUILDINGS STAND ON THE SITE; ONE IS AN OLD LUMBER COMPANY STORE, THE OTHER WAS A GAS STATION THAT HAS BEEN RENOVATED TO AN USED CAR RETAILER. BOTH BUILDINGS ARE SITUATED ON PAVED LOTS AND ARE CONNECTED TO NEWER NONHISTORIC ADDITIONS. THE OLD GAS STATION LOT STILL CONTAINS ITS HISTORIC TEXACO SIGN BASE AND THE OLD LUMBER COMPANY BUILDING HAS MAINTAINED ITS ORIGINAL FRONT PORCH WITH A NEW HANDRAIL.

   b. General description of project and its effect on the historic resource(s), the environmental setting, and, where applicable, the historic district:

   A NEW SENIOR HOUSING ESTABLISHMENT IS BEING PROPOSED FOR THE SITE, LOCATED BEHIND THE HISTORIC BUILDINGS. IT WILL HAVE A ONE STORY CONNECTOR FROM THE MAIN BUILDING TO THE HISTORIC BUILDINGS COMPRISED MOSTLY OF GLASS AS TO NOT DRAW ATTENTION AWAY OR COMPETE WITH THE HISTORIC ARCHITECTURE. THE INTERIORS OF THE HISTORIC BUILDINGS WILL BE CHANGED TO PRIVATE USE FOR THE SENIOR HOUSING AS WELL AS A PUBLIC COFFEE SHOP. THE EXTERIORS OF THE BUILDINGS WILL REMAIN INTACT ONLY TO RECEIVE NEW FINISHES IN KIND TO WHAT CURRENTLY EXISTS.

2. SITE PLAN
   Site and environmental setting, drawn to scale. You may use your plot. Your site plan must include:
   a. the scale, north arrow, and date;
   b. dimensions of all existing and proposed structures;
   c. site features such as walkways, driveways, fences, ponds, streams, trash dumpsters, mechanical equipment, and landscaping.

3. PLANS AND ELEVATIONS
   You must submit 2 copies of plans and elevations in a format no larger than 11" x 17". Plans on 8 1/2" x 11" paper are preferred.
   a. Schematic construction plans, with marked dimensions, indicating location, size, and general type of walls, window, and door openings, and other fixed features of both the existing resources and the proposed work.
   b. Elevations (facades), with marked dimensions, clearly indicating proposed work in relation to existing construction and, when appropriate, context. All materials and fixtures proposed for the exterior must be noted on the elevations drawings. An existing and a proposed elevation drawing of each facade affected by the proposed work is required.

4. MATERIALS SPECIFICATIONS
   General description of materials and manufactured items proposed for incorporation in the work of the project. This information may be included on your design drawings.

5. PHOTOGRAPHS
   a. Clearly labeled photographic prints of each facade of existing resource, including details of the affected portions. All labels should be placed on the front of photographs.
   b. Clearly label photographic prints of the resource as viewed from the public right-of-way and of the adjoining properties. All labels should be placed on the front of photographs.

6. TREE SURVEY
   If you are proposing construction adjacent to or within the drip line of any tree 8" or larger in diameter (at approximately 4 feet above the ground), you must file an accurate tree survey identifying the size, location, and species of each tree of at least that dimension.

7. ADDRESSES OF ADJACENT AND CONFRONTING PROPERTY OWNERS
   For ALL projects, provide an accurate list of adjacent and confronting property owners (not tenants), including names, addresses, and zip codes. This list should include the owners of all lots or parcels which adjoin the parcel in question, as well as the owner(s) of lot(s) or parcel(s) which lie directly across the street/highway from the parcel in question.

PLEASE PRINT (IN BLUE OR BLACK INK) OR TYPE THIS INFORMATION ON THE FOLLOWING PAGE.
PLEASE STAY WITHIN THE GUIDES OF THE TEMPLATE, AS THIS WILL BE PHOTOCOPIED DIRECTLY INTO MAILING LABELS.
