MONTGOMERY COUNTY HISTORIC PRESERVATION COMMISSION
STAFF REPORT

Address: 4709 Dorset Ave., Chevy Chase  
Meeting Date: 4/25/2018

Resource: Primary (Pre-1915) Resource  
Report Date: 4/18/2018
(Somerset Historic District)

Applicant: Luke Olson  
Public Notice: 4/11/2018

Review: HAWP  
Tax Credit: Partial

Case Number: 35/36-18A REVISION  
Staff: Michael Kyne

PROPOSAL: Building addition

STAFF RECOMMENDATION

Staff recommends that the HPC approve the HAWP application.

ARCHITECTURAL DESCRIPTION

SIGNIFICANCE: Primary (Pre-1915) Resource within the Somerset District.
STYLE: Colonial Revival/Queen Anne
DATE: c. 1900

BACKGROUND

The applicant previously appeared before the Commission for preliminary consultations at the January 10, 2018 and February 13, 2018 (rescheduled from February 7, 2013 due to inclement weather) HPC meetings. The applicant returned at the March 14, 2018 HPC meeting, when their HAWP application for a building addition was approved with conditions.

PROPOSAL

The applicant proposes the following revisions to the previously approved HAWP application:

- Replace the existing asphalt shingles on the historic house in-kind in lieu of the previously approved cedar shingles.
- Install asphalt shingles on the previously approved rear addition and hyphen in lieu of the previously approved cedar shingles and standing seam metal roofing.
- Install a single patio door on the second-floor of the rear elevation of the previously approved rear addition in lieu of the previously approved double French door.
- Install a fiber cement panel canopy over the entry on the left side of the previously approved hyphen.

APPLICABLE GUIDELINES

When reviewing alterations and new construction within the Somerset Historic District several documents are to be utilized as guidelines to assist the Commission in developing their decision. These documents
include Montgomery County Code Chapter 24A (Chapter 24A), the Somerset Historic District Guidelines (Guidelines), and the Secretary of the Interior’s Standards for Rehabilitation (Standards). The pertinent information in these documents is outlined below.

**Montgomery County Code; Chapter 24A-8**

(b) The commission shall instruct the director to issue a permit, or issue a permit subject to such conditions as are found to be necessary to insure conformity with the purposes and requirements of this chapter, if it finds that:

1. The proposal will not substantially alter the exterior features of an historic site or historic resource within an historic district; or

2. The proposal is compatible in character and nature with the historical, archaeological, architectural or cultural features of the historic site or the historic district in which an historic resource is located and would not be detrimental thereto or to the achievement of the purposes of this chapter; or

**Somerset Historic District Guidelines**

- The earliest portion of the Town of Somerset was founded in the late 19th Century as a trolley suburb. This area is significant as one of the first trolley suburbs in Montgomery County and is representative of the beginnings of suburbanization.

- Somerset was developed in 1890 by the Somerset Heights Colony Company. This group purchased approximately 50 acres of farmland with the goal of creating a clean, safe, residential community—far enough away from the dangers and dirt of the city, but close enough to commute to work by trolley.

- Five of the original partners of the Somerset Heights Colony Company were associated with the U.S. Department of Agriculture. By 1895, four of these five men had built large homes for themselves within the new community. Three of these houses are still standing.

- From the beginning, sales were brisk and, by 1910, there were 173 residences in Somerset.

- Of particular interest are a number of houses built by Richard and William Ough between 1900 and 1915. These structures were an early examples of standardization—they exhibit a number of common characteristics: mitred bay corner towers, wrap-around porches, and hipped roofs with a gable peak visible on the front façade.

- Houses which were built in Somerset during its primary period of architectural importance (1890 to 1915) represent a wide variety of Victorian styles: Carpenter Gothic, Queen Anne, and Italianate. In addition, there are some good examples of the Bungalow style. As a group, the early houses in Somerset represent one of the best concentrated collections of Victorian residential architecture in the County.

- Other important features which create and enhance the historic character of the Somerset community include: the spacing and rhythm of buildings, the uniform scale of existing houses, the relationship of houses to the street, the ample size lots and patterns of open space in the neighborhood, the mature trees and landscaping, and the grid system of streets with clearly defined streetscapes. These elements should be retained and preserved as the area continues to grow and develop.
A map of the boundaries of the Somerset Historic District is included at the end of this amendment. Important contributing resources built before 1915 are noted on this map. The later structures in the district are mainly mid-20th Century architectural styles—many are Colonial Revival—although some very recent houses have replicated the Victorian styles of the original buildings. As specified in the Historic Preservation Ordinance, applications for new construction in the district or for work on structures in the district which are of little historical or design significance shall be judged leniently, unless such plans would seriously impair the historic or architectural value of surrounding historic resources or would impair the character of the district.

Secretary of Interior's Standards for Rehabilitation

The Secretary of the Interior defines rehabilitation as “the act or process of making possible a compatible use for a property through repair, alterations, and additions while preserving those portions or features, which convey its historical, cultural, or architectural values.” The Standards are as follows:

2. The historic character of a property shall be retained and preserved. The removal of historic materials or alteration of features and spaces that characterize a property shall be avoided.

9. New additions, exterior alterations, or related new construction shall not destroy historic materials that characterize the property. The new work shall be differentiated from the old and shall be compatible with the massing, size, scale, and architectural features to protect the historic integrity of the property and its environment.

10. New additions and adjacent or related new construction shall be undertaken in such a manner that if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.

STAFF DISCUSSION:

The applicant proposes the following revisions to the previously approved HAWP application:

- Replace the existing asphalt shingles on the historic house in-kind in lieu of the previously approved cedar shingles. This is an in-kind alteration and is not subject to review by the HPC.

- Install asphalt shingles on the previously approved rear addition and hyphen in lieu of the previously approved cedar shingles and standing seam metal roofing. Staff finds that the proposed roofing materials are compatible with the historic house, and the proposed revision will not detract from the streetscape.

- Install a single patio door on the second-floor of the rear elevation of the previously approved rear addition in lieu of the previously approved double French door. The proposed alteration is compatible with the character of house historic house and is at the rear of the previously approved rear addition, where it will not be at all visible from the public right-of-way.

- Install a fiber cement panel canopy over the entry on the left side of the previously approved hyphen. The proposed canopy will be inset 6" from the rear/left corner of the historic house and will only be partially visible when viewing the property from an extreme oblique angle. The proposed canopy is compatible with the characteristics of the previously approved rear addition and hyphen, in material and design. Staff finds that the proposed canopy will not detract from the character-defining features of the subject property or streetscape.
After full and fair consideration of the applicants' submission, staff finds the proposal as being consistent with the Criteria for Issuance in Chapter 24A-(b) 1 and 2, and having found the proposal is consistent with the Secretary of the Interior's Standards for Rehabilitation outlined above.

**STAFF RECOMMENDATION:**

Staff recommends that the Commission **approve** the HAWP application under the Criteria for Issuance in Chapter 24A-8(b), having found that the proposal will not substantially alter the exterior features of the resource and is compatible in character with the resource and the purposes of Chapter 24A;

and with the Secretary of the Interior's Standards for Rehabilitation #2, 9, and 10;

and with the general condition that the applicant shall present the 3 permit sets of drawings, if applicable, to Historic Preservation Commission (HPC) staff for review and stamping prior to submission for the Montgomery County Department of Permitting Services (DPS) building permits;

and with the general condition that final project design details, not specifically delineated by the Commission, shall be approved by HPC staff or brought back to the Commission as a revised HAWP application at staff’s discretion;

and with the general condition that the applicant shall notify the Historic Preservation Staff if they propose to make any alterations to the approved plans. Once the work is completed the applicant will contact the staff person assigned to this application at 301-563-3400 or michael.kyne@montgomeryplanning.org to schedule a follow-up site visit.

SEE REVERSE SIDE FOR INSTRUCTIONS
a. Description of existing structure(s) and environmental setting, including their historical features and significance

The existing house is a 2-story front gable Colonial Revival/Queen Anne (pre-1915) with a 2-story gambrel addition on the right side and a 1-story addition to the rear. There is also a driveway leading to a detached one-car garage in the rear yard which has been converted into a conditioned studio space. We had previously submitted a HAWP application for an addition/renovation to the existing historic resource that was reviewed and approved at the March 14, 2018 HPC meeting.

b. General description of project and its effects on the historic resource(s), the environmental setting, and, where applicable, the historic district:

As stated above, our previous HAWP application for a rear addition was reviewed and approved at the March 14, 2018 HPC meeting. The homeowners have since received preliminary pricing back on the proposed work and have instructed us to identify ways to reduce the cost of the project to fit their budget. To that end, we are proposing to make the following changes:

-We had previously received approval to replace the existing asphalt shingle roof with cedar roofing, and to provide cedar roofing to match on the addition along with a small portion of standing seam metal roofing. We are now requesting approval to replace the existing asphalt shingle roof in-kind with an asphalt shingle roof of a different color, Certainteed Landmark Pro 30 year warranty asphalt shingles or approved equal, with asphalt shingle roofing on the addition to match.

-The approved HAWP application included a 2-panel French patio door on the second level of the rear elevation. We’d like to modify that door to a single panel patio door.

-The approved HAWP application included two windows on the left elevation in the new Family Room. We’d like to remove one of those windows.

We have also been working with a civil engineer to grade out the site to provide positive drainage and to deal with all stormwater on-site per Montgomery County SWM requirements. We’ve identified the left elevation as an area that is of particular concern, given the proximity of the existing house to the lot line and the grade of the lot and the neighboring property. In order to alleviate some of those concerns, we would like to provide a canopy over the left side entry to minimize the likelihood of water infiltration at that location. The proposed canopy would project roughly 4’ out from the left side elevation of the addition and would terminate 6” short of the left-rear corner of the existing house, so it would not be visible from the street.

Given the minimal visibility and impact to the majority of these revisions, we feel like they should be approved on the basis that they are not detrimental to either the existing historic resource or the Town of Somerset Historic District. The roof revision is the only change that is visible from the street, and as we are proposing an in-kind replacement of the existing roofing material with new roofing on the addition to match, we feel that the proposed revision is consistent with the applicable Criteria for issuance as well as the Secretary of the Interior’s Standards for Rehabilitation.
Introducing the Aspyre Collection from James Hardie®

Elevate the art of multi-family design by having high performance with high design at any time imagineable. The Aspyre Collection brings
through the Royal Panel Systems and Artisan™ using temperature and outdoor conditions. Each product
can be used individually or in combination with other products for a new way of
designing homes that are not limited by architectural constraints.

The Royal Panel Systems combine the benefits of
insulation, durability, and cost-effectiveness in a
range of colors and finishes for interior and exterior options.

Contact your local Aspyre dealer for gorgeous
options for your new home or business.
CONTRAST
DIMENSIONS

The Aspen Collection encourages a sense of unity with a visual mix of authority meets profiles. And contrast to the house aesthetic of smooth Reveal either with the sophisticated accent tree or Artisan brings.

REVEAL

Artisan
5x1 3"x3.5"x3.5"

The panel system's trim and corner details can be combined with the array of Artisan lock joints and lap panels to make a variety of shadow, overlapping patterns.
RETHINK
THE CLASSICS

Make your mark in traditional home design by combining the beauty of wood with low maintenance.

The Artisan collection is replicated by craftsmen and artists to create this beautiful, clean, and contemporary look. The high performance, low-maintenance cladding is uniquely designed to resist water, decay, and insects, protecting your home for years to come. Visit usyss.com for more information.

Anything is possible

The proprietary engineering and 5/8 inch thickness of the Akseal coating profiles provide a precision fit and finish as well as creative freedom. You can mix colors for attractive, coordinated styles, add visual interest by overhanging any of the Akseal cornice profiles virtually. Utilize these profiles on both siding and soffits to bring continuity to your overall design.
COLOR

YOUR VISION

With the increasing number of luxury apartments, mansions and condominiums
practically bustling with colors, we are now living in a world where colors
are no longer just a matter of decoration but a way of expressing
our unique identity. James Martin's
advanced paint and coating technology offers infinite possibilities
for creating vibrant and sophisticated designs and performances.

Every interior designer and architect needs to
considerate of your unique needs. You can
purchase products that best suit your needs from James Martin's
diverse range of colors. The ColorSelect System
is a perfect example of how you can
create a perfect color match to
your project's needs.

PERFORMANCE

WITHOUT COMPROMISE

The Custom Collection provides the unrivaled performance you've come
to expect from James Martin's high-quality products. All products are rigorously
tested and certified to ensure that they meet the highest standards
of beauty, durability, and performance. The Custom Collection offers
a wide range of colors and finishes to suit any project,
whether it be a residential or commercial
building.

Each product is designed to provide
unparalleled performance in various
environments, from high-traffic areas
to intimate spaces.

The Custom Collection is your
ultimate choice for achieving
outstanding results in any project.

Together, we can create the
perfect blend of color and performance
for your unique vision.

James Martin's commitment
to quality and innovation
ensures that you get
more than just a
paint product; you get
a partner in creating
the vision you imagine.
