EXPEDITED
MONTGOMERY COUNTY HISTORIC PRESERVATION COMMISSION
STAFF REPORT

Address: 31 Oxford St., Chevy Chase
Meeting Date: 10/10/2018

Resource: Contributing Resource
(Chevy Chase Village Historic District)
Report Date: 10/3/2018

Applicant: Dan Morgan and Mary Elaine Shannon
Public Notice: 9/26/2018

Tax Credit: Yes

Review: HAWP
Staff: Michael Kyne

Case Number: 35/13-18AA

PROPOSAL: Siding alteration, roof replacement, and shutter replacement

STAFF RECOMMENDATION:
☑ Approve
☐ Approve with conditions

ARCHITECTURAL DESCRIPTION

SIGNIFICANCE: Contributing Resource within the Chevy Chase Village Historic District
STYLE: Craftsman
DATE: c. 1916-27

PROPOSAL:
The applicants are proposing rehabilitation work at the subject property, with the following specifications:

• Removal of the non-historic aluminum siding.
• Repairs and painting of the original cedar siding.
• In-kind replacement of the three-tab asphalt roofing shingles.
• Replacement of the non-historic aluminum louvered shutters (11 pairs total) with wooden louvered shutters (operable) of the same dimensions.
• Other repairs, including re-caulking of the historic windows.

APPLICABLE GUIDELINES:

Policy On Use of Expedited Staff Reports for Simple HAWP Cases

IV. The Expedited Staff Report format may be used on the following type of cases:

2. Modifications to a property, which do not significantly alter its visual character.
Montgomery County Code; Chapter 24A-8

(b) The commission shall instruct the director to issue a permit, or issue a permit subject to such conditions as are found to be necessary to insure conformity with the purposes and requirements of this chapter, if it finds that:

(1) The proposal will not substantially alter the exterior features of an historic site or historic resource within an historic district; or
(2) The proposal is compatible in character and nature with the historical, archeological, architectural or cultural features of the historic site or the historic district in which an historic resource is located and would not be detrimental thereto or to the achievement of the purposes of this chapter; or
(3) The proposal would enhance or aid in the protection, preservation and public or private utilization of the historic site or historic resource located within an historic district in a manner compatible with the historical, archeological, architectural or cultural value of the historic site or historic district in which an historic resource is located; or
(4) The proposal is necessary in order that unsafe conditions or health hazards be remedied; or
(5) The proposal is necessary in order that the owner of the subject property not be deprived of reasonable use of the property or suffer undue hardship; or
(6) In balancing the interests of the public in preserving the historic site or historic resource located within an historic district, with the interests of the public from the use and benefit of the alternative proposal, the general public welfare is better served by granting the permit.

(c) It is not the intent of this chapter to limit new construction, alteration or repairs to any period or architectural style.

(Ord. No. 9-4, § 1; Ord. No. 11-59.)

STAFF RECOMMENDATION:

Staff recommends that the Commission approve the HAWP application under the Criteria for Issuance in Chapter 24A-8(b), (1) & (2) and having found that the proposal will not substantially alter the exterior features of the historic resource and is compatible in character with the district and the purposes of Chapter 24A;

and with the Secretary of the Interior’s Standard for Rehabilitation #2 and 9;

and with the general condition that the applicant shall present the 3 permit sets of drawings, if applicable, to Historic Preservation Commission (HPC) staff for review and stamping prior to submission for the Montgomery County Department of Permitting Services (DPS) building permits;

and with the general condition that final project design details, not specifically delineated by the Commission, shall be approved by HPC staff or brought back to the Commission as a revised HAWP application at staff’s discretion;

and with the general condition that the applicant shall notify the Historic Preservation Staff if they propose to make any alterations to the approved plans. Once the work is completed the applicant will contact the staff person assigned to this application at 301-563-3400 or michael.kyne@montgomeryplanning.org to schedule a follow-up site visit.

SEE REVERSE SIDE FOR INSTRUCTIONS
THE FOLLOWING ITEMS MUST BE COMPLETED AND THE
REQUIRED DOCUMENTS MUST ACCOMPANY THIS APPLICATION.

1. WRITTEN DESCRIPTION OF PROJECT
   a. Description of existing structure(s) and environmental setting, including their historical features and significance:

   See attached

   b. General description of project and its effect on the historic resource(s), the environmental setting, and, where applicable, the historic district:

   See attached

2. SITE PLAN
   Site and environmental setting, drawn to scale. You may use your plot. Your site plan must include:
   a. the scale, north arrow, and date;
   b. dimensions of all existing and proposed structures; and
   c. site features such as walkways, driveways, fences, ponds, streams, trash dumpsters, mechanical equipment, and landscaping.

3. PLANS AND ELEVATIONS
   You must submit 2 copies of plans and elevations in a format no larger than 11" x 17". Plans on 8 1/2" x 11" paper are preferred.
   a. Schematic construction plans, with marked dimensions, indicating location, size and general type of walls, window and door openings, and other fixed features of both the existing resource(s) and the proposed work.
   b. Elevations (facades), with marked dimensions, clearly indicating proposed work in relation to existing construction and, when appropriate, context. All materials and fixtures proposed for the exterior must be noted on the elevations drawings. An existing and a proposed elevation drawing of each facade affected by the proposed work is required.

4. MATERIALS SPECIFICATIONS
   General description of materials and manufactured items proposed for incorporation in the work of the project. This information may be included on your design drawings.

5. PHOTOGRAPHS
   a. Clearly labeled photographic prints of each facade of existing resource, including details of the affected portions. All labels should be placed on the front of photographs.
   b. Clearly label photographic prints of the resource as viewed from the public right-of-way and of the adjoining properties. All labels should be placed on the front of photographs.

6. TREE SURVEY
   If you are proposing construction adjacent to or within the dripline of any tree 6" or larger in diameter (at approximately 4 feet above the ground), you must file an accurate tree survey identifying the size, location, and species of each tree at least that dimension.

7. ADDRESSES OF ADJACENT AND CONFRONTING PROPERTY OWNERS
   For ALL projects, provide an accurate list of adjacent and confronting property owners (not tenants), including names, addresses, and zip codes. This list should include the owners of all lots or parcels which adjoin the parcel in question, as well as the owner(s) of lot(s) or parcel(s) which lie directly across the street/highway from the parcel in question.

PLEASE PRINT (IN BLUE OR BLACK INK) OR TYPE THIS INFORMATION ON THE FOLLOWING PAGE.
PLEASE STAY WITHIN THE GUIDES OF THE TEMPLATE, AS THIS WILL BE PHOTOCOPIED DIRECTLY ONTO MAILING LABELS.

Application for Historic Area Work Permit

To: Montgomery County Historic Preservation Commission
Department of Permitting Services (DPS)
255 Rockville Pike, Rockville, Md. 20850
240.777.0311.

From Dan Morgan and Mary Elaine Shannon
31 Oxford Street
Chevy Chase, Md. 20815

1. **Written description of project**

   a. Description of existing structure and environmental setting, including historical features and significance:

   The Chevy Chase Village Historic District was created in 1995, with 11 buildings initially, and expanded in 1998 to include 326 structures, mostly residences, between the Chevy Chase Club and Bradley Lane on the north and Western Avenue on the south.
The house at 31 Oxford Street, built between 1906 and 1908, shares that history and exemplifies the graceful architectural styles of the historic community.

According to a document available on the Montgomery Planning Department website, quoting Places from the Past: The Tradition in Gardez Bien in Montgomery County, Maryland by Clare Lise Cavicchi:

Architecturally, Chevy Chase Village contains the county’s highest concentration of outstanding architect-designed and builder vernacular suburban houses rendered in post-Victorian styles of the period 1890-1930. Together, the surviving plan and architecture of Chevy Chase Village represents one of the most intact and important examples of suburban planning and architectural expression built in the region before World War II.

The three-story craftsman-style house at 31 Oxford Street is typical of the large, graceful houses constructed in Chevy Chase Village soon after the neighborhood was established in 1890. A cornerstone found on the property is inscribed 1906. Montgomery County property records give the date of construction as 1908. It appears to be the oldest structure on Oxford Street. A capped well in the back yard suggests that a farm once sat on or near the site.

The house is a white wood frame house, sided with cedar shingles seen throughout Chevy Chase Village. It has a graceful wrap-around veranda with cylindrical columns and original architectural details inside and out. Doors, windows, mahogany bannisters and other features are original. The rooms have high ceilings and moulding. The floors are of red pine no longer available. The windows are large and well-placed to bring light into the house.

Over the years, we have changed nothing about the appearance of the house from the street. Very few changes have been made in the rear. The floor plan has never changed. Our efforts have focused on restoring, rehabilitating and preserving the house as its builder originally conceived it.

We acquired the house in 1985 and found it in need of extensive repairs and rehabilitation. The front porch had large holes in the floor. The columns that hold up the roof over the porch were sagging. The foundation was crumbling. The heating system was decades old. Joists had been severed, causing the whole structure to sink inward. The previous owners attempted to remedy this critical problem by jerry-rigging a two-story jack that reached from the cement basement floor to the top of the kitchen. The jack supported an I-beam that extended across the kitchen ceiling to support the second and third floors.

We replaced the rotted front porch floor with tropical mahogany, which has a long life and can withstand Washington’s weather extremes. We installed a new roof, with asphalt shingles, the same material as we found when we moved in.
The floor plan of the house is as it was originally constructed, with one exception: a flat-roofed family room apparently added to the rear in the 1960s. We found this room partly finished, with subflooring but no flooring, rudimentary space heating and a rudimentary powder room. We finished it in 1989, with a maple floor and central heating and air conditioning. We added glass sliding doors to the garden. We re-roofed the flat family room roof.

Also in 1989, we updated the kitchen and restored the original hardwood flooring, hidden under layers of vinyl tile. The kitchen features wood cabinets and tile. It has the look of a farmhouse kitchen, in keeping with the period of the house. In 1989, we undertook extensive work to reinforce the original foundation. We updated the second-floor bathroom, replacing plastic tile tiled with high quality ceramic tiles. We repaired and painted ceilings and walls damaged by leaks from the second and third bathrooms.

In 2005, we added an air conditioning system to the second and third floors, using a Unico ductless system designed specifically for retrofitting historic structures. This system did not require alteration of the interior to accommodate ducts.

In 2012, we updated the third floor bathroom. In 2014, we replaced the sewage outflow pipe, which had crumbled over the years and was undermining the foundation.

The previous owners covered the entire house’s cedar siding with aluminum siding. When we rehabilitated the kitchen in 1989, we removed the aluminum siding on the exterior walls of the kitchen. We hope to remove the rest of the aluminum siding this year.

In 2016, we repainted and restored the plaster walls of the living room, dining room and entrance hall, which are the oldest part of the house. We used historic colors found in the homes of George Washington and Thomas Jefferson. We finished the 1960s-era powder room, replacing a plywood-and-plastic vanity with an heirloom-quality tiger maple vanity and mirror and adding a hardwood floor.

When we moved into the house in 1985, the side yard and much of the back yard were paved with asphalt. The previous owners had used the yard as a parking lot for their several vehicles. We had the asphalt dug out by hand. Over the years we added soil and plants. In 2014, we had the garden designed by Alida Morgan, an artist and professional landscape designer. We made broader perennial beds and added tables and benches.

Today, 31 Oxford Street looks much as it did when it was built. Like all houses, and for that matter, all people, it takes work to stay the same.
b. General description of project and its effect on the historic resource, the environmental setting and the historic district

We propose to continue our work to restore the house to its original beauty and maintaining it good condition. Our current project is straightforward: cleaning, repairing and repainting. We contemplate no changes to the structure. We plan to:

- Clean and paint peeling and mildewed all painted surfaces.
- Remove aluminum siding applied by a previous owner.
- Caulk and repaint the original cedar siding, with repairs as needed.
- Replace fake aluminum shutters with real wooden shutters that match original wooden shutters.
- Replace aging roof with missing shingles with new roof, with asphalt shingles, the same as before. Windows will be recaulked and preserved.

Once the repairs and repainting are accomplished, the house will look the same as it always had, but fresher.
