EXPERTISED
MONTGOMERY COUNTY HISTORIC PRESERVATION COMMISSION
STAFF REPORT

Address: 7206 Holly Ave., Takoma Park
Resource: Outstanding Resource
Applicant: Karl Wright and Jolefien Van Damme

Meeting Date: 3/13/2019
Report Date: 3/6/2019
Public Notice: 2/27/2019
Tax Credit: N/A

Review: HAWP
Staff: Michael Kyne
Case Number: 37/03-19I

PROPOSAL: New hardscaping and retaining wall

STAFF RECOMMENDATION:

☑ Approve
☐ Approve with conditions

ARCHITECTURAL DESCRIPTION

SIGNIFICANCE: Outstanding Resource within the Takoma Park Historic District
STYLE: Queen Anne
DATE: c. 1885-1888

PROPOSAL:

The applicants propose the following alterations at the subject property:

- Removal of the existing concrete front walkway, steep concrete stairs from the sidewalk, and iron pipe railing.
- Construction of new stairs from the sidewalk with two landings.
  o Treads and landing to be flagstone.
  o Risers to be stone.
  o Retaining walls to be PA fieldstone with stone caps.
- Installation of new ornamental metal handrails at the new stairs from the sidewalk.
- Construction of a new curvilinear flagstone front walkway.
- Planting of two ornamental trees at the front.

The proposed curvilinear walkway is consistent with the surrounding streetscape, which includes a variety of walkway configurations and materials. The applicants have a Tree Protection Permit with the City of Takoma Park and plan to use hand tools for the project, ensuring that an existing mature Holly tree is not damaged during the project.
APPLICABLE GUIDELINES:

Policy On Use of Expedited Staff Reports for Simple HAWP Cases

IV. The Expedited Staff Report format may be used on the following type of cases:

2. Modifications to a property, which do not significantly alter its visual character.

11. Construction or replacement of walkways, parking areas, patios, driveways or other paved areas that are not readily visible from a public right-of-way and/or are compatible in material, location, and design with the visual character of the historic site or district.

12. Construction or repair of retaining walls where the new walls are compatible in material, location, design and height with the visual character of the historic site or district.

Montgomery County Code; Chapter 24A-8

(b) The commission shall instruct the director to issue a permit, or issue a permit subject to such conditions as are found to be necessary to insure conformity with the purposes and requirements of this chapter, if it finds that:

(1) The proposal will not substantially alter the exterior features of an historic site or historic resource within an historic district; or

(2) The proposal is compatible in character and nature with the historical, archeological, architectural or cultural features of the historic site or the historic district in which an historic resource is located and would not be detrimental thereto or to the achievement of the purposes of this chapter; or

(3) The proposal would enhance or aid in the protection, preservation and public or private utilization of the historic site or historic resource located within an historic district in a manner compatible with the historical, archeological, architectural or cultural value of the historic site or historic district in which an historic resource is located; or

(4) The proposal is necessary in order that unsafe conditions or health hazards be remedied; or

(5) The proposal is necessary in order that the owner of the subject property not be deprived of reasonable use of the property or suffer undue hardship; or

(6) In balancing the interests of the public in preserving the historic site or historic resource located within an historic district, with the interests of the public from the use and benefit of the alternative proposal, the general public welfare is better served by granting the permit.

(c) It is not the intent of this chapter to limit new construction, alteration or repairs to any 1 period or architectural style.

(d) In the case of an application for work on an historic resource located within an historic district, the commission shall be lenient in its judgment of plans for structures of little historical or design significance or for plans involving new construction, unless such plans would seriously impair the historic or architectural value of surrounding historic resources or would impair the character of the historic district. (Ord.No.9-4, § 1; Ord.No.11-59.)

Secretary of Interior’s Standards for Rehabilitation

The Secretary of the Interior defines rehabilitation as “the act or process of making possible a compatible use for a property through repair, alterations, and additions while preserving those portions or features, which convey its historical, cultural, or architectural values.” The Standards are as follows:
2. The historic character of a property shall be retained and preserved. The removal of historic materials or alteration of features and spaces that characterize a property shall be avoided.

9. New additions, exterior alterations, or related new construction shall not destroy historic materials that characterize the property. The new work shall be differentiated from the old and shall be compatible with the massing, size, scale, and architectural features to protect the historic integrity of the property and its environment.

**STAFF RECOMMENDATION:**

Staff recommends that the Commission approve the HAWP application under the Criteria for Issuance in Chapter 24A-8(b), (1), (2) & (d) having found that the proposal is consistent with the Takoma Park Historic District Guidelines, and therefore will not substantially alter the exterior features of the historic resource and is compatible in character with the district and the purposes of Chapter 24A;

and with the Secretary of the Interior’s Standards for Rehabilitation #2 and 9;

and with the general condition that the applicant shall present the 3 permit sets of drawings, if applicable, to Historic Preservation Commission (HPC) staff for review and stamping prior to submission for the Montgomery County Department of Permitting Services (DPS) building permits;

and with the general condition that final project design details, not specifically delineated by the Commission, shall be approved by HPC staff or brought back to the Commission as a revised HAWP application at staff’s discretion;

and with the general condition that the applicant shall notify the Historic Preservation Staff if they propose to make any alterations to the approved plans. Once the work is completed the applicant will contact the staff person assigned to this application at 301-563-3400 or michael.kyne@montgomeryplanning.org to schedule a follow-up site visit.

LOCATION INFORMATION

House Number: 3206  
Street: Holly Ave

Town/City: Takoma Park  
Nearest Cross Street: Tulip Ave

Lot #: 12  
Block: 20  
Subdivision: 025  
District: 13

PART ONE: TYPE OF PERMIT, ACTION AND USE

1A. CHECK ALL APPLICABLE:

☐ Construct  ☐ Extend  ☐ Alter/Remodel  ☐ A/C  ☐ Stab  ☐ Room Addition  ☐ Porch  ☐ Deck  ☐ Shed
☐ Move  ☐ Install  ☐ Wreck/Raze  ☐ Solar  ☐ Fireplace  ☐ Woodburning Stove  ☐ Single Family
☐ Revision  ☐ Repair  ☐ Revocable  ☐ Fence/Wall  ☐ Other: Exter|or FRONT STAIRS

1B. Construction cost estimate: $10,000

1C. If this is a revision of a previously approved active permit, see Permit #

PART TWO: DISPOSAL, DETAIL OF WATER SUPPLY AND SEWER DISPOSAL

2A. Type of sewer disposal:  
☐ 01 WSSC  ☐ 02 Septic  ☐ 03 Other

2B. Type of water supply:  
☐ 01 WSSC  ☐ 02 Well  ☐ 03 Other

PART THREE: COMPLETE ONLY ON FENCE, RETAINING WALL

3A. Height: ___ feet ___ inches

3B. Indicate whether the fence or retaining wall is to be constructed on one of the following locations:

☐ On party line/property line  ☐ Entirely on land of owner  ☐ On public right of way/ easement

I hereby certify that I have the authority to make this application, that the application is correct, and that the construction will comply with plans approved by all agencies listed and I hereby acknowledge and accept this to be a condition for the issuance of this permit.

Date Issued:

SEE REVERSE SIDE FOR INSTRUCTIONS
THE FOLLOWING ITEMS MUST BE COMPLETED AND THE REQUIRED DOCUMENTS MUST ACCOMPANY THIS APPLICATION.

1. WRITTEN DESCRIPTION OF PROJECT
   a. Description of existing structure(s) and environmental setting, including their historical features and significance:

   CATEGORY ONE RESOURCE IN TAKOMA PARK HISTORIC DISTRICT, WITH REAL ADDITION ADDED IN 1987

   b. General description of project and its effect on the historic resource(s), the environmental setting, and, when applicable, the historic district:

   REMOVE EXISTING (BENN+ MARL+ STEEL) CONCRETE STAIRS LEADING FROM SIDEWALK TO FRONT ENTRANCE
   CONSTRUCT NEW STAIRWAY AND LANDINGS AS PER ENCLOSED DRAWINGS AND DESCRIPTION

2. SITE PLAN
   Site and environmental setting, drawn to scale. You may use your plat. Your site plan must include:
   a. the scale, north arrow, and date;
   b. dimensions of all existing and proposed structures; and
   c. site features such as walkways, driveways, fences, ponds, streams, trash dumpsters, mechanical equipment, and landscaping.

3. PLANS AND ELEVATIONS
   You must submit 2 copies of plans and elevations in a format no larger than 11" x 17". Plans on 8 1/2" x 11" paper are preferred.
   a. Schematic construction plans, with marked dimensions, indicating location, size and general type of walls, window and door openings, and other fixed features of both the existing resources(s) and the proposed work.
   b. Elevations (facades), with marked dimensions, clearly indicating proposed work in relation to existing construction and, when appropriate, context. All materials and fixtures proposed for the exterior must be noted on the elevations drawings. An existing and a proposed elevation drawing of each facade affected by the proposed work is required.

4. MATERIALS SPECIFICATIONS
   General description of materials and manufactured items proposed for incorporation in the work of the project. This information may be included on your design drawings.

5. PHOTOGRAPHS
   a. Clearly labeled photographic prints of each facade of existing resource, including details of the affected portions. All labels should be placed on the front of photographs.
   b. Clearly label photographic prints of the resource as viewed from the public right-of-way and of the adjoining properties. All labels should be placed on the front of photographs.

6. TREE SURVEY
   X TREE IMPACT ASSESSMENT HAS BEEN REQUESTED

   If you are proposing construction adjacent to or within the dripline of any tree 6' or larger in diameter (at approximately 4 feet above the ground), you must file an accurate tree survey identifying the size, location, and species of each tree of at least that dimension.

7. ADDRESSES OF ADJACENT AND CONFRONTING PROPERTY OWNERS
   For ALL projects, provide an accurate list of adjacent and confronting property owners (not tenants), including names, addresses, and zip codes. This list should include the owners of all lots or parcels which adjoin the parcel in question, as well as the owner(s) of lot(s) or parcel(s) which lie directly across the street/highway from the parcel in question.

PLEASE PRINT (IN BLUE OR BLACK INK) OR TYPE THIS INFORMATION ON THE FOLLOWING PAGE.
PLEASE STAY WITHIN THE GUIDES OF THE TEMPLATE, AS THIS WILL BE PHOTOCOPIED DIRECTLY ONTO MAILING LABELS.

A TREE PROTECTION PLAN HAS BEEN AGREED ON WITH THE CITY OF TAKOMA PARK.
1. This plan is a copy of a recording shown as it is required by a lender or a title insurance company or its agent in connection with contemplated transfer, financing or re-financing.
2. This plan is not to be relied upon for the establishment or location of fences, garages, buildings, or other existing or future improvements.
3. This plan does not provide for the accurate identification of property boundary lines, but such identification may not be required for the transfer of title or securing financing or re-financing.
4. Building line and/or Flood Zone information is taken from available sources and is subject to interpretation of originator.
5. No Title Report furnished.
Notes:
1. Remove existing broken concrete stairs and replace with new in hip siding to the left.
2. Existing risers 82-1/2" with different height of all steps.
3. Elevation of left hand to be raised 18" making total 100-1/2"
4. Cut existing wall in either side to accommodate a 9' opening.
5. Construct new stonework as per drawing with following details:
   - Walls of PA fieldstone, owners choice size stones 4-6" above soil level.
   - Top of wall fieldstone stone percent flagstone cap (owners choice).
   - Steps 9" wide with two (2)x 4" landing with at least 6' opening with a level Keystone.
   - First step at 18".
   - Ram in 9" of stone and finish 91/2" of flagstone, with 1" overhang.
   - Walk with minimum 90 degree to garden.
   - Landing 9" wide and 3' deep.
   - Walk leads leading to top stone irregular flagstone on embankment.
   - Canistoi under wall at top of stone for future landscapel wire to see lighting on stairs.
   - Two (2) line posts at the top of the stairs, max 12" above the wall of stone with flagstone cap.
   - 2" x 2" x 12" for carriage lamp.
   - Railings for safety will be done by artist, details will follow.
Notes:

1. Remove existing broken concrete stairs and remove and heel in big azalea to the left of stairs
2. Existing risers (8-1/2") with different height of all risers
3. Elevation existing walk needs to be raised (18") making (total of 100-1/2")
4. Cut existing wall on either side to accommodate a 9" opening
5. Construct new stairway as per drawing with following details:

- Walls of PA fieldstone, owners choice size stones 4-6" above soil level
- Top of walls natural unless owner prefers flagstone cap (owners choice)
- Steps 5'6" wide with two (2) 5'x5' landing with at base a 9' opening with 2 level wingwalls
- First step is set in 12"
- Risers 3/" of stone and Tread 12' of flagstone, with 1" overhang
- Walk with minimum 1% slope to garden
- Landing 9'0" wide and 7'0" deep
- Walk from landing to top stairs irregular flagstone on stonedust
- Conduit under walk at top of stairs for future electrical wire to use lighting on stairs
- Two (2) low posts at the top of the stairs, max 12" above the wall of stone with flagstone cap
- with 1" 100-1/2" overhang for carriage lamp
- Railing for safety will be done by artist, details will follow

Appendix
Prior to submitting the Tree Protection Plan to the City of Takoma Park, make sure the following items have been accomplished:

- Date entered on cover
- Check in the amount of $100.00 attached (note: If you have previously paid $50.00 for a Tree Impact Assessment, attach a check in the amount of $50.00.)
- Provided project address (page 3)
- Provided property owner information (page 3)
- Provided all contractor information (page 3)
- Described project (page 3)
- Homeowner and contractor understand all items in checklist (pages 4 - 7)
- Read and understand penalties for non-compliance (page 8)
- Homeowner signed document (page 9)
- Contractor signed document (page 9)
- Provided address of all contiguous properties
- Made 2 copies of document; 1 for homeowner and 1 for contractor
- Attached site plans to document
- Shown on plans all relevant tree protection measures
Section I: Property Owner and Contractor Information
print all information legibly

A. Address of Proposed Project: 7206 Holly Ave

B. Property Owner Information
1. Property Owner’s Name: Jozefien Van Damme
2. Property Owner’s Address: 7206 Holly Ave
3. Property Owner’s Daytime Phone Number: (202) 569 6865

C. General Contractor Information
1. Contractor’s Name: Nicolien Van Schouwen
   European Garden Design
2. Contractor’s Address: 3403 Maple Ave
3. Contractor’s Phone Number: (301) 742 5020
4. Contractor’s License Numbers: 231-25-0662

D. Arborist Information
1. Arborist’s Name: Jan Van Zutphen
2. Arborist’s Address: ________________________________
3. Arborist’s Phone Number: ___________________________
4. Arborist’s Maryland Tree Expert License Number: ____________

E. Proposed Project
1. Describe project and attach any applicable plans:
   REPLACEMENT OF EXTERIOR CONCRETE STAIRS:
   REMOVE EXISTING CONCRETE STAIRS FROM SIDEWALK TO FRONT
   ENTRANCE. CONSTRUCT NEW STAIRWAY AND LANDINGS
   AS PER ENCLOSED DRAWINGS AND DESCRIPTION

   City Use Only:
Section II. Tree Protection Plan Requirements. (Check all that apply; #1 and #2 are required on every application)

1. Critical Root Zones
   - Critical root zones of trees shall be affected by the proposed construction and/or disturbances.

2. Tree Protection Fencing
   - Tree protection fencing shall be erected to ensure that a majority of the critical root zone of each tree affected is left undisturbed by the construction. The distance (in feet) between the base of the trees and the tree protection fencing is documented on attached site drawings and shall not be moved for the duration of construction. The type of fencing erected is stated or attached to this plan.

   NOTE: It is critical that all involved parties are aware of the location of the fences. Any movement of fences from prior agreed upon locations could result in a stop work order.

   Property owner initials

   Contractor initials

3. Signage
   - Signs posted on the tree protection fences will be needed to explain the purpose of the fences and the need to keep them in place. An example of the signs needed is on page 14.

4. Equipment Usage
   - All work shall be done by hand, and no heavy equipment, vehicles, etc. will be utilized on site. Using a jackhammer is considered doing work by hand. A walkway must be left immediately adjacent to the existing work. Work shall be accomplished with heavy equipment and hand labor. Equipment to be used on site is noted on an attached sheet. No other equipment except that listed on this attachment shall be used on site.

   NOTE: Any and all operators of heavy equipment, vehicles, etc. must understand that the tree protection fencing is there to protect the trees. It is the responsibility of the contractor to inform all operators and subcontractors that they are not to damage, destroy, move, or alter the tree protection fences in...
any fashion.

5. Silt Fencing

☐ Silt fencing is required to minimize runoff onto the roots of the affected tree(s) and shall be installed on the uphill side of the tree protection fence. Indicate silt fence location on site plan.

6. Grade Changes

☐ Grade changes will occur on site. Indicate all grade changes on site plan, and indicate if changes are below or above grade and by how much.

7. Root Pruning

☐ Root pruning will be done because of excavation in or near the critical root zone(s) of the tree(s). A root pruner, vibratory plow, sharp stump grinder, or a shovel/spade will be used. All root pruning will be done to a depth of 18 inches. All root pruning will occur before any excavation occurs. Indicate on the site plan where root pruning will occur and indicate below which root pruning method(s) will be used.

______________________________
______________________________

Property owner initials Contractor initials

8. Tunneling

☐ Some work will be carried out by tunneling, moling, or directional boring at a minimum depth of 24 inches from the soil surface. The location of the proposed tunnel is on the attached plan.

9. Trenching

☐ Trenching shall be done within the critical root zone of the affected tree(s). Any roots over one-half (½) inch in diameter shall be cleanly pruned with a sharp lopper, or saw. The location of the proposed trench is on the attached plan. Root pruning will occur before any trenching takes place.
10. **Root Protection/Soil Compaction**

- Root protection to avoid damage from equipment, materials and vehicles is necessary at the job site. Mulching depths and fabric usage is detailed on an attached sheet or below. All areas identified as root protection areas to minimize soil compaction are shown on attached site plan. Materials used and depths at which they are used are explained below.

---

11. **Soil Compaction Mitigation**

- Vertical mulching shall be done by drilling holes 2 - 2 1/2 inches in diameter and 12 - 18 inches deep into the compacted soil. The holes will encompass the critical root zones of the affected trees and will be spaced 2 feet apart in a grid pattern. The holes will be filled with a porous material mixture such as leaf mulch, perlite, pea gravel, or vermiculite.

- Radial mulching/trenching will be done by making radial trenches, in a spoke pattern, around the tree. The trenches will have soil replacement done by using a mixture of topsoil, organic mixes, leaf mulch or vermiculite. The trenches will start at least four feet from the base of the tree, extend out at least 10 feet and be no closer than 5 feet from each other.

- An air spade will be used to remove the compacted soil. The soil will be replaced immediately with a highly organic soil mix.

12. **Fertilization**

- Because the trees will be under stress from construction, fertilization is required. It will be done with a slow release fertilizer and no less than 1 lb. of N/1000

13. **Watering Contingency**

- Affected trees shall be watered during times of low rainfall (less than 1" of rain per 14 day period) twice per six day period, at four hours per event. The entire critical root zone of the tree(s) shall be watered with this prescription.
14. Pruning

☐ Pruning of dead wood will be done to specific trees on the property or nearby properties. The tree(s) are indicated on the attached plan or at the end of Section II.

☐ Because of the vertical profile of the construction project, some live tree limbs will be pruned. The affected tree(s) are indicated on the attached plan or at the end of Section II.

NOTE: All pruning shall be done by a Licensed Tree Expert with the State of Maryland.

15. Pest/Pathogen Control

☐ Any affected trees that experience an insect or disease infestation during the construction phase of the project shall be treated to control/eliminate the infestation at the property owner’s expense. Treatment must be carried out by a Licensed Tree Expert and a Certified Pesticide Applicator with the State of Maryland.

16. Logistics

☐ Material will be stored on-site. The attached site plan shows where materials will be stored in relationship to the trees and the protection devices.

____ Property owner initials    _____ Contractor initials

17. Other

☐ Other protection measures to be taken are as follows (attach additional sheets if necessary):

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________
Section III. Restrictions and penalties for non-compliance.

1. Violation of the provisions agreed to in this document may lead to job shutdown for a minimum of 24 hours, levying of Municipal Infractions under City Code No. 1995-5, or other penalties to the property owner, contractor, or both parties.

2. This Tree Protection Plan has been submitted to satisfy the requirements of the City’s Tree Ordinance, No. 2000-17. Approval of this plan does not absolve the property owner, contractor, or other parties involved in the project from other permits or requirements which may be required, be they local, County, State, Federal, or other.

3. Any contract tree work must be conducted by a Tree Expert licensed in the State of Maryland. The license number ("LTE" designation) of the Tree Expert must be submitted to the City Arborist before the work begins.

4. All pruning must be done in accordance with the American National Standard for Tree Care Operations (ANSI A300 (Part 1) -2001 Pruning).

5. All tree work safety precautions must be done in accordance with the American National Standard for Tree Care Operations - Safety Requirements (ANSI Z133.1-1994).

6. All tree protection fencing, silt fencing, or other tree protection devices must be inspected and approved by the City’s Arborist or designee three (3) working days prior to the start of construction.

7. Any modification of the plans and conditions submitted and agreed to in this document must be approved in writing by the City Arborist or designee a minimum of five (5) days before the modifications are enacted.
Section IV.  Signatures

The following persons agree to abide by the conditions outlined in this Tree Protection Plan and all of its attachments.

Property Owner’s Printed Name & Signature:  

Jozefien Van Dame

Date Signed:  01/25/2019

Tree Contractor’s Printed Name & Signature:  

Date Signed:  

General Contractor’s Printed Name & Signature:

Re: Same
Takoma Park, MD 20912

Dear Jozefien Van Damme:

Your Tree Protection Plan for 7206 Holly Avenue has received preliminary approval with the City of Takoma Park. Per Chapter 12, Section 307(b)(2) of the City Code, all properties that share a common property line with the above property must be informed of the preliminary approval and have the right to review or contest the Tree Protection Plan have been notified. The comments period runs from 2/07/19 – 2/22/19.

The Tree Protection Plan documents relating to this project can be viewed at the Public Works office.

If you have any questions contact me at 301-891-7612 or JanvZ@Takomaparkmd.gov for more information.

Sincerely,

Jan van Zutphen
Urban Forest Manager,
The City of Takoma Park MD
