MONTGOMERY COUNTY HISTORIC PRESERVATION COMMISSION
STAFF REPORT

Address: 6950 Carroll Ave., Takoma Park
Resource: Outstanding Resource
Takoma Park Historic District
 Applicant: Bank of America
(Monica Young, Agent)
Review: HAWP
Case Number: 37/03-19EEE
PROPOSAL: Sign Replacement

Meeting Date: 2/12/2020
Report Date: 2/05/2020
Public Notice: 1/29/2020
Staff: Dan Bruechert

RECOMMENDATION

Staff recommends the HPC approve the HAWP application.

ARCHITECTURAL DESCRIPTION

SIGNIFICANCE: Outstanding Resource within the Takoma Park Historic District
STYLE: Beaux Arts
DATE: 1927

Fig. 1: The subject property is at the edge of the historic district at the intersection of Carroll Ave. and Willow Ave.
PROPOSAL

The applicant proposes to replace two signs.

APPLICABLE GUIDELINES

When reviewing alterations and additions for new construction to Contributing Resources within the Takoma Park Historic District, decisions are guided by the Takoma Park Historic District Design Guidelines (Guidelines) and Montgomery County Code Chapter 24A (Chapter 24A), and the Secretary of the Interior’s Standards for Rehabilitation (Standards). As this project is also in one of the two commercial districts in Takoma Park review of the project shall be guided by the Design Guidelines for Commercial Buildings in the City of Takoma Park, Maryland.

Takoma Park Historic District Design Guidelines
There are two very general, broad planning and design concepts which apply to all categories. These are:

- The design review emphasis will be restricted to changes that are at all visible from the public right-of-way, irrespective of landscaping or vegetation (it is expected that the majority of new additions will be reviewed for their impact on the overall district), and,

- The importance of assuring that additions and other changes to existing structures act to reinforce and continue existing streetscape, landscape, and building patterns rather than to impair the character of the district.

Outstanding Resources have the highest level of architectural and/or historical significance. While they will receive the most detailed level of design review, it is permissible to make sympathetic alterations, changes, and additions. The guiding principles to be utilized by the Historic Preservation Commission are the Secretary of the Interior’s Standards for Rehabilitation

Specifically, some of the factors to be considered in reviewing HAWPs on Outstanding Resources:

- Plans for all alterations should be compatible with the resource’s original design; additions, specifically, should be sympathetic to existing architectural character, including massing, height, setback, and materials

- Emphasize placement of major additions to the rear of existing structures so that they are less visible from the public right-of-way

- While additions should be compatible, they are not required to be replicative of earlier architectural styles

- Preservation of original and distinctive architectural features, such as porches, dormers, decorative details, shutters, etc., is encouraged

- Preservation of original windows and doors, particularly those with specific architectural importance, and of original size and shape of openings is encouraged

- Preservation of original building materials and use of appropriate, compatible new materials is encouraged
All changes and additions should respect existing environmental settings, landscaping, and patterns of open space

**Montgomery County Code, Chapter 24A Historic Resources Preservation**

(b) The commission shall instruct the director to issue a permit, or issue a permit subject to such conditions as are found to be necessary to insure conformity with the purposes and requirements of this chapter, if it finds that:

1. The proposal will not substantially alter the exterior features of an historic site or historic resource within an historic district; or
2. The proposal is compatible in character and nature with the historical, archeological, architectural or cultural features of the historic site or the historic district in which an historic resource is located and would not be detrimental thereto or to the achievement of the purposes of this chapter; or
3. In the case of an application for work on an historic resource located within an historic district, the commission shall be lenient in its judgment of plans for structures of little historical or design significance or for plans involving new construction, unless such plans would seriously impair the historic or architectural value of surrounding historic resources or would impair the character of the historic district. (Ord. No. 9-4, § 1; Ord. No. 11-59.)

**Secretary of the Interior’s Standards for Rehabilitation**

2. The historic character of a property will be retained and preserved. The removal of distinctive materials or alteration of features, space and spatial relationships that characterize a property will be avoided.

9. New additions, exterior alterations, or related new construction will not destroy historic materials, features, and spatial relationships that characterize the property. The new work shall be differentiated from the old and will be compatible with the historic materials, features, size, scale and proportions, and massing to protect the integrity of the property and its environment.

10. New additions and adjacent or related new construction will be undertaken in such a manner that, if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.

**STAFF DISCUSSION**

The applicant proposes to replace the internally illuminated commercial signs on the east and west building elevations with new internally illuminated signs with rectangular ‘cabinet’ backgrounds.

The existing signs are internally illuminated channel letter signs with the Bank of America logo and a white background panel. The larger, east sign is 21’ 3 3/8” × 3’ 6 ¾” (twenty-one feet, three and three-eighths inch wide by three feet, six and three-fourths inches tall); and the smaller west sign is 15’ 9 3/8” × 2’ 7 ½” (fifteen feet, nine and three-eighths inch wide by two feet, seven and one-half inches tall). Based on a review of permit applications for the subject property, these signs were installed in late 1999 or early 2000.

The proposed signs will have internally illuminated channel letters applied to a “garbo silver” i.e. light grey, rectangular ‘cabinet.’ The signs will project 6 1/16” (six and one-sixteenth inches) from the building wall. Both the east and west signs will match the dimensions of the existing signs.

The larger, east sign will be installed on top of the entablature which, based on the color of the stone, is not the original building fabric. This location is, however, where signage for the bank building would have been historically located. Staff finds the proposed location for the east sign is appropriate. The
I.

The proposed sign, with its surrounding cabinet, will obscure no more of the building materials than the existing sign. Staff finds the materials comply with the *Design Guidelines for Commercial Buildings in the City of Takoma Park, Maryland* (attached) which identifies both acrylic and aluminum as appropriate materials for signs in the commercial areas of the Takoma Park Historic District. Additionally, while the commercial *Design Guidelines* state a preference for externally lit signs, they do permit the use of individually lit characters. Staff finds that the proposed east sign is compatible with the surrounding commercial section of the historic district.

The proposed sign on the western elevation will be installed in the same location as the existing sign, utilizing the same electrical conduit. This sign is near the cornice adjacent to an alley access to the subject property’s parking area. Like the proposed sign for the east side, this sign will utilize the existing electrical conduit and mounting points. Staff finds the proposed placement for this sign is appropriate. As with the east sign, Staff finds that the proposed design and materials are compatible with guidance provided in the *Design Guidelines for Commercial Buildings in the City of Takoma Park, Maryland*.

At the December 10, 2019, Façade Advisory Board (FAB), the FAB considered the application and voted to disapprove the application with the following comments (letter attached). The applicant’s responses follow:

1. **The sign should be made of historically appropriate materials**
   - Bank of America signage is constructed from aluminum and acrylic. The proposed signage complies with the list of materials allowed by the Commission and represents Bank of America’s brand. Production drawings are included for more details. We feel internally illuminated signage creates a cleaner look for the building while assisting customers in finding the branch. External lighting, or gooseneck fixtures, require additional building penetrations and increase the busyness of the façade.

2. **The sign should be monochromatic**
   - Bank of America prefers to keep full-color signage as its federally trademarked brand colors are important in customer recognition.
   
   *Note: the HPC does not regulate color.*

3. **Any lighting for the signage should be a warm light temperature.**
   - The specified LED temperature was consciously selected to represent the brand colors at night. Photo examples of illuminated signage provided.

4. **Installation needs to reuse existing alterations to the stone.**
   - The installation will utilize existing penetrations for attachment and conduit. Additional penetrations are necessary but will be kept to the minimum. It does appear replacement material was used on the elevation facing Willow Ave. (the east elevation).

5. **The Board would like to see examples of Bank of America signs in other historic districts to see how the signage can be modified.**
   - Bank of America only recently rolled out the image in this submittal. Unfortunately, we do not have examples of the new brand image in alternative formats.

Staff finds that the proposed sign will replace one contemporary designed sign with another in matching dimensions. The sign placement is historically appropriate and, while the materials are modern, they are determined to be appropriate by the *Design Guidelines for Commercial Buildings*. As this the proposed signs are replacements, utilizing the existing conduit and wall penetrations will do little damage to the building and would be easily removed in the future. Staff recommends approval of this HAWP.
STAFF RECOMMENDATION

Staff recommends that the Commission approve the HAWP under the Criteria for Issuance in Chapter 24A-8(b)(2), (c), and (d), and having found that the proposal will not substantially alter the exterior features of the historic resource and is compatible in character with the district, the Takoma Park Historic District Guidelines, and Design Guidelines for Commercial Buildings in the City of Takoma Park, Maryland; and the purposes of Chapter 24A;

and with the Secretary of the Interior’s Standards for Rehabilitation #2, #9, and #10,

and with the general condition that the applicant shall present the 3 permit sets of drawings, if applicable, to Historic Preservation Commission (HPC) staff for review and stamping prior to submission for the Montgomery County Department of Permitting Services (DPS) building permits;

and with the general condition that final project design details, not specifically delineated by the Commission, shall be approved by HPC staff or brought back to the Commission as a revised HAWP application at staff’s discretion;

and with the general condition that the applicant shall notify the Historic Preservation Staff if they propose to make any alterations to the approved plans. Once the work is completed the applicant will contact the staff person assigned to this application at 301-563-3400 or dan.bruechert@montgomeryplanning.org to schedule a follow-up site visit.

Chairman Sandra Heiler  
Historic Preservation Commission  
8787 Georgia Avenue  
Silver Spring, MD 20910

RE: 6950 Carroll Avenue, Takoma Park, Maryland – parking attendant booth

Dear Ms. Heiler,

The Takoma Park Façade Advisory Board met on December 10, 2019 to review the design proposal for 6950 Carroll Avenue, Takoma Park, Maryland. The proposal is to be considered by the Historic Preservation Commission.

Monica Young, of Kerley Signs, presented the proposal for a replacement signage for Bank of America.

The Takoma Park Façade Advisory Board passed the following resolution:

The Board voted to disapprove the application as submitted with the following comments:

1. The sign should be made of historically appropriate materials.
2. The sign should be monochromatic.
3. Any lighting for the signage should be a warm lighting temperature.
4. Installation needs to reuse existing alterations to the stone.
5. The Board would like to see examples of Bank of America signs in other historic districts to see how the signage can be modified.

Thank you for the efforts of the Commission to preserve the unique architectural character of our historic business district. If you have questions regarding the Board’s action, please call me at 301-891-7205.

Sincerely,

Community Development Manager
