MONTGOMERY COUNTY HISTORIC PRESERVATION COMMISSION
STAFF REPORT

Address: 6950 Carroll Ave., Takoma Park  
Meeting Date: 3/25/2020

Resource: Outstanding Resource  
Report Date: 3/18/2020
Takoma Park Historic District  
Public Notice: 3/11/2020

Applicant: Bank of America  
Tax Credit: No
(Monica Young, Agent)

Review: HAWP  
Staff: Dan Bruechert

Case Number: 37/03-20T

PROPOSAL: Sign Replacement

RECOMMENDATION

Staff recommends the HPC approve the HAWP application.

ARCHITECTURAL DESCRIPTION

SIGNIFICANCE: Outstanding Resource within the Takoma Park Historic District
STYLE: Beaux Arts
DATE: 1927

Fig. 1: The subject property is at the edge of the historic district at the intersection of Carroll Ave. and Willow Ave.
**BACKGROUND**

On February 12, 2020, the HPC considered the HAWP for 6050 Carroll Ave. The HPC had questions for the applicant, so consideration of the HAWP was postponed until the applicant was in attendance.

On February 26, 2020, the HPC continued consideration of the hearing with a representative from the applicant in attendance. The HPC, citing the opposition to the proposal by the Takoma Park Façade Advisory Board, signaled that they would be more receptive to a proposal without the larger white/silver backer board (‘cabinet’). The applicant withdrew their HAWP at the hearing and has returned with a revised proposal.

**PROPOSAL**

The applicant proposes to replace two signs at the cornice on the east and west elevations.

**APPLICABLE GUIDELINES**

When reviewing alterations and additions for new construction to Contributing Resources within the Takoma Park Historic District, decisions are guided by the Takoma Park Historic District Design Guidelines (Guidelines) and Montgomery County Code Chapter 24A (Chapter 24A), and the Secretary of the Interior’s Standards for Rehabilitation (Standards). As this project is also in one of the two commercial districts in Takoma Park review of the project shall be guided by the Design Guidelines for Commercial Buildings in the City of Takoma Park, Maryland.

**Takoma Park Historic District Design Guidelines**

There are two very general, broad planning and design concepts which apply to all categories. These are:

- The design review emphasis will be restricted to changes that are at all visible from the public right-of-way, irrespective of landscaping or vegetation (it is expected that the majority of new additions will be reviewed for their impact on the overall district), and,

- The importance of assuring that additions and other changes to existing structures act to reinforce and continue existing streetscape, landscape, and building patterns rather than to impair the character of the district.

Outstanding Resources have the highest level of architectural and/or historical significance. While they will receive the most detailed level of design review, it is permissible to make sympathetic alterations, changes, and additions. The guiding principles to be utilized by the Historic Preservation Commission are the Secretary of the Interior’s Standards for Rehabilitation

Specifically, some of the factors to be considered in reviewing HAWPs on Outstanding Resources:

Plans for all alterations should be compatible with the resource’s original design; additions, specifically, should be sympathetic to existing architectural character, including massing, height, setback, and materials

---

Emphasize placement of major additions to the rear of existing structures so that they are less visible from the public right-of-way

While additions should be compatible, they are not required to be replicative of earlier architectural styles

Preservation of original and distinctive architectural features, such as porches, dormers, decorative details, shutters, etc., is encouraged

Preservation of original windows and doors, particularly those with specific architectural importance, and of original size and shape of openings is encouraged

Preservation of original building materials and use of appropriate, compatible new materials is encouraged

All changes and additions should respect existing environmental settings, landscaping, and patterns of open space

**Montgomery County Code, Chapter 24A Historic Resources Preservation**

(b) The commission shall instruct the director to issue a permit, or issue a permit subject to such conditions as are found to be necessary to insure conformity with the purposes and requirements of this chapter, if it finds that:

(1) The proposal will not substantially alter the exterior features of an historic site or historic resource within an historic district; or

(2) The proposal is compatible in character and nature with the historical, archeological, architectural or cultural features of the historic site or the historic district in which an historic resource is located and would not be detrimental thereto or to the achievement of the purposes of this chapter; or

(d) In the case of an application for work on an historic resource located within an historic district, the commission shall be lenient in its judgment of plans for structures of little historical or design significance or for plans involving new construction, unless such plans would seriously impair the historic or architectural value of surrounding historic resources or would impair the character of the historic district. (Ord. No. 9-4, § 1; Ord. No. 11-59.)

**Secretary of the Interior’s Standards for Rehabilitation**

2. The historic character of a property will be retained and preserved. The removal of distinctive materials or alteration of features, space and spatial relationships that characterize a property will be avoided.

9. New additions, exterior alterations, or related new construction will not destroy historic materials, features, and spatial relationships that characterize the property. The new work shall be differentiated from the old and will be compatible with the historic materials, features, size, scale and proportions, and massing to protect the integrity of the property and its environment.

10. New additions and adjacent or related new construction will be undertaken in such a manner that, if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.

**STAFF DISCUSSION**

The applicant proposes to replace the internally illuminated commercial signs on the east and west building elevations with new internally illuminated signs installed on a raceway to conceal the electrical conduit.
The existing signs are internally illuminated channel letter signs with the Bank of America corporate name logo. The new sign will have an updated Bank of America font and logo. The two proposed signs are larger than what is currently installed on the building. The proposed east sign will increase in area from 75 ft\(^2\) to 75.9 ft\(^2\). The proposed western sign will increase in area from 46.6 ft\(^2\) to 75.9 ft\(^2\).

<table>
<thead>
<tr>
<th></th>
<th>East Sign</th>
<th>West Sign</th>
</tr>
</thead>
<tbody>
<tr>
<td>Existing</td>
<td>25' × 3'</td>
<td>19' 1&quot; × 2' 4&quot;</td>
</tr>
<tr>
<td>Proposed</td>
<td>27' 5/8&quot; × 2' 8 ½&quot;</td>
<td>27' 5/8&quot; × 2' 8 ½&quot;</td>
</tr>
</tbody>
</table>

Based on a review of permit applications for the subject property, the existing signs were installed in late 1999 or early 2000.

The proposed signs will have internally illuminated channel letters installed on a raceway that will be painted to closely match the color of the building and conceal the internal electrical conduit. The proposed signs will have a very similar appearance to the existing signs but will use a different font for the lettering. Additionally, because the proposed signs will use LED lighting the letters will not project as far from the building face as the existing signs do.

The sign on the east elevation will be just over 2’ (two feet) longer than the existing but will be approximately 4” (four inches) narrower than the existing.

*Figure 2: East elevation of 6950 Carroll Avenue, Takoma Park.*
The proposed sign on the western elevation will be installed in the same location as the existing sign. The applicant proposes to install the same size sign on the west elevation as proposed for the east. The new sign on the west elevation will be 8' (eight feet) longer than the existing sign and 4” (four inches) taller.

![Figure 3: West elevation of 6950 Carroll Avenue, Takoma Park.](image)

Staff finds that the proposed signs are substantially similar to what is installed today. The proposed signs will be installed in the same locations as the existing ones. The materials proposed (i.e. acrylic and aluminum) match the materials utilized in the existing signs. And while the HPC does not regulate color, the proposed sign colors will match the existing red and blue signs. HPC decisions do not establish precedent, but they do inform future interpretations of the requisite guidance. In 1999, the HPC reviewed and approved this existing design.

Staff additionally finds that the proposed signage location is appropriate for a bank of this style. The original historic sign was carved in the entablature on the south elevation above the front doors (see the attached newspaper articles). While the proposed signs are not over the main entrance, they are placed in appropriate locations.

Staff finds that while the materials are not traditional, the Design Guidelines for Commercial Buildings in the City of Takoma Park identify both acrylic and aluminum as appropriate materials for signs in the commercial areas of the Takoma Park Historic District. Additionally, while the commercial Design Guidelines state a preference for externally lit signs, they do permit the use of the individually lit
characters that are proposed in this application. Staff finds that the design and materials of the sign are compatible with the surrounding commercial section of the historic district.

At the March 10, 2020, Takoma Park Façade Advisory Board meeting the FAB passed the following resolution:

“The Board voted to approve the signage as proposed for Bank of America at 6950 Carroll Avenue on the east and west facades, with the strong condition that the obscurement of the “Takoma Park Bank” sign on the Carroll Avenue façade be removed within two weeks of installation of the new signage. Without the removal of the obscurement of the “Takoma Park Bank” sign, the Board wants to review the sign proposal again to request smaller signage on the east and west side. In addition, the installation of the east and west façade signs must use the existing holes from previous sign installations.”

Staff agrees with the FAB that it would be preferable for the historic sign to be uncovered, however, this is not in the scope of work proposed in this HAWP. Many historic structures would benefit from restoration, but the proposal at hand is for sign installation only. The question before the HPC is whether the proposal complies with the requisite guidance (approval), does not comply with the requisite guidance (denial), or could comply with the requisite guidance with modification (approval with identified conditions). The executive regulations do not state that the HPC may require additional work in order to bring a project into compliance.

Staff finds that the proposal will replace both contemporary designed signs with new contemporary signs. The sign placement is historically appropriate and, while the materials are modern, they are determined to be appropriate by the Design Guidelines for Commercial Buildings. As the proposed signs are replacements, utilizing the existing conduit and wall penetrations will do little damage to the building and would be easily removed in the future, Staff recommends approval of this HAWP.

**STAFF RECOMMENDATION**

Staff recommends that the Commission **approve** the HAWP under the Criteria for Issuance in *Chapter 24A-8(b)(2), (c), and (d)*, and having found that the proposal will not substantially alter the exterior features of the historic resource and is compatible in character with the district, the Takoma Park Historic District Guidelines, and Design Guidelines for Commercial Buildings in the City of Takoma Park, Maryland; and the purposes of Chapter 24A;

and with the *Secretary of the Interior’s Standards for Rehabilitation #2, #9, and #10,*

and with the general condition that the applicant shall present the **3 permit sets of drawings, if applicable, to Historic Preservation Commission (HPC) staff for review and stamping** prior to submission for the Montgomery County Department of Permitting Services (DPS) building permits;

and with the general condition that final project design details, not specifically delineated by the Commission, shall be approved by HPC staff or brought back to the Commission as a revised HAWP application at staff’s discretion;

and with the general condition that the applicant shall notify the Historic Preservation Staff if they propose to make **any alterations** to the approved plans. Once the work is completed the applicant will **contact the staff person** assigned to this application at 301-563-3400 or **dan.bruechert@montgomeryplanning.org** to schedule a follow-up site visit.

Chairman Sandra Heiler  
Historic Preservation Commission  
8787 Georgia Avenue  
Silver Spring, MD 20910

RE: 6950 Carroll Avenue, Takoma Park, Maryland – Bank of America signage

Dear Ms. Heiler,

The Takoma Park Façade Advisory Board met on March 10, 2020 to review the new design proposal for 6950 Carroll Avenue, Takoma Park, Maryland for the Bank of America signage on the 1927 Beaux Arts building, an outstanding and rare resource in Takoma Park. The proposal is to be considered by the Historic Preservation Commission.

On March 10, 2020, the Takoma Park Façade Advisory Board passed the following resolution:

The Board voted to approve the signage as proposed for Bank of America at 6950 Carroll Avenue on the east and west facades, with the strong condition that the obscurement of the “Takoma Park Bank” sign on the Carroll Avenue façade be removed within two weeks of installation of the new signage. Without the removal of the obscurement of the “Takoma Park Bank” sign, the Board wants to review the sign proposal again to request smaller signage on the east and west side. In addition, the installation of the east and west façade signs must use the existing holes from previous sign installations.

Thank you for the efforts of the Commission to preserve the unique architectural character of our historic business district. If you have questions regarding the Board’s action, please call me at 301-891-7205.

Sincerely,

Community Development Manager

Fire Destroys George And 3 Auto Tracks

The George Hotel and the three auto tracks owned by St. George Hotel Co. in the 1100 block of South Georgia Ave. were destroyed by a fire that started near the intersection of Georgia and Carroll Avenues about 2 a.m. today. The fire spread to the George Hotel and the tracks, as well as to the garage between the tracks and the George. A man who was staying in the George was rescued by a fireman who entered the hotel through a window and guided him to a safe place. The man was uninjured.

COUNTY FAIR OPENS TUESDAY

27th Annual Exhibit of Montgomery Agri-cultural Society

PETITIONS FOR

From Across the Hills.

The Washington Press, in connection with the State Press Association, will hold an active campaign for the next three days to promote the movement for the passage of the Senate bill for the improvement of the public squares in the capital.

The measure, which was introduced by Senator H. W. Smith, was adopted by the Senate last week, and has been referred to the Committee on Roads and Highways.

The bill provides for the construction of a concrete highway along the National Mall, running from the Washington Monument to the Smithsonian Institution, with a sidewalk along the eastern side.

The measure is designed to provide a more attractive and convenient thoroughfare for the public, and to improve the appearance of the city.

The plan is to construct a concrete highway along the National Mall, running from the Washington Monument to the Smithsonian Institution, with a sidewalk along the eastern side.

**3 New Series—New Lower Prices**

**The Finest, Fastest cars in all Nash history**

Greater SPEED than ever before is a keynote characteristic of the new Nash models. There is one, FASTER cars than any Nash has ever developed. Nash has worked wonders in turning the phenomenal possibilities of the 170-horse motor into realities. Just drive one of these new Nash models. Their lightning-like pick-up, their amazing speed, and their unshaken smoothness will give you a distinct new motoring thrill. And they're the EASIEST riding cars you ever traveled in.

Each model is equipped with the new Nash screw press alloy steel springs.

These new springs are individually engineered to each model—tailored scientifically to the weight and size of the car. Even the Standard Six Series—priced down to the 4-cylinder field—have these remarkable springs. There are 21 new Nash models for you to inspect. They offer new beauties in body design and rich new color harmonies in finishes.

Come in and see them at once. At the new lower prices Nash has established you offer motor car quality and value without a parallel.

Before you buy, have any car—DRIVE one of the new Nash models.
