About the FY2021 School Utilization Report

On November 16, 2020, the Montgomery County Council adopted the 2020-2024 Growth and Infrastructure Policy, formerly known as the Subdivision Staging Policy. The new policy requires the Planning Department to provide a Utilization Report along with the Annual School Test to provide supplemental information about the utilization of the county’s public school infrastructure.

The report includes little narrative or interpretation of the data – only brief explanation of the data presented in the graphs. It also consists of two main parts: a countywide component and an individual school component.

➢ The Countywide Utilization Report includes:
  o Trends of past and projected collective enrollment, capacity, and utilization rates for schools across the county, at each school level.
  o Share of school facilities at each school level operating at various adequacy levels. The levels chosen relate to the utilization thresholds used to determine Utilization Premium Payments.¹

➢ The Individual School Utilization Report includes:
  o Trends of past and projected enrollment, capacity, and utilization rates of individual schools.

Data Sources & Modifications

The source of data and method of modifications is consistent with the Annual School Test.

• Past trends are all based on actual enrollment and capacity figures reported in ‘MCPS Educational Facilities Master Plan and Capital Improvements Program’ publications each fiscal year.

• Projected trends are taken from the current educational facilities master plan, however the same rules that govern the Annual School Test are used to make modifications for schools where a capacity solution has been approved but not reflected in the enrollment or capacity projections. The modification is applied to the school year in which the capacity solution is scheduled to be completed, and each subsequent projection year.

¹ Note that the Utilization Premium Payment requirements are identified as part of the Annual School Test and are based on projected utilization rates four years in the future along with corresponding seat deficits.
Countywide Data

There are two types of graphs currently provided in the Countywide Utilization Report. The first is a combination bar and line graph that shows the enrollment and capacity actuals, collectively, for all of Montgomery County’s public elementary, middle or high schools. The actuals are shown from SY 2005 (school year 2005-06) through SY 2019. Projections, pulled from the FY 2021 MCPS Educational Facilities Master Plan, are also provided for SY 2020 through SY 2025. This graph also includes a line that shows the corresponding countywide rate of capacity utilization for the school level.

The second type of graph is a stacked bar graph that shows the distribution of the county’s public elementary, middle or high schools by utilization rate. Again, the graph is based on actual utilization rate for SY 2005 through SY 2019, and projected utilization rate for SY 2020 through SY 2025. For example, the graph on page 12 demonstrates that 12% of the county’s public elementary schools had a utilization rate below 90% in SY 2005. That same year, 22% of the high schools had a utilization rate of 135% or higher.
**Individual School Data**

The Individual School Utilization Report includes one primary graph for each school. The combination bar and line graph that shows the enrollment and capacity actuals for the school from SY 2005 through SY 2019. Projections, pulled from the FY 2021 MCPS Educational Facilities Master Plan, are also provided for SY 2020 through SY 2025. This graph also includes a line that shows the corresponding rate of capacity utilization for the school.

In addition to the graph, information pertaining to the school facility and site are provided, including the year the facility was built, when the facility was last renovated and/or expanded, the facility’s gross floor area and the size of the school site. The number of relocatable classrooms on the site for purposes of relieving overcrowding in SY 2019 is also included.

For each school, links are included to the corresponding pages for each adjacent school at the same school level.

Finally, information is provided regarding the status of the school in the FY 2021 Annual School Test. This includes identifying what level of Utilization Premium Payment (UPP) is required, if any, for development approved in the school’s service area. This includes a graphic that demonstrates where the school’s projected utilization falls relative to the UPP utilization rate thresholds and the seat deficit thresholds. In order to trigger a payment at a particular UPP tier, the projected utilization must meet the thresholds for both factors. The image below provides a visualization of how the UPP tier is determined based on the utilization rate and seat deficit thresholds.
Future Utilization Reports

Future School Utilization Reports, beginning with the FY2022 report, will be released in June of each year. Over time, additional information will be included as data are collected, reviewed and prepared for presentation. Such data may include information on individual school core capacity, as well as countywide trends in the use of relocatable classrooms. Historical trends in housing permits issued and real estate transactions by school service areas may also be provided to better demonstrate connections between these trends and school enrollment. The reports may also move to a purely digital format with interactive graphs.
