EXPEDITED
MONTGOMERY COUNTY HISTORIC PRESERVATION COMMISSION
STAFF REPORT

Address: 8100 Georgia Ave., Silver Spring  
Meeting Date: 1/27/2021

Resource: Master Plan Site #36/15  
Meeting Date: 1/20/2021
Silver Spring B & O Railroad Station

Applicant: Montgomery Preservation, Inc.  
Report Date: 1/20/2021

Review: HAWP  
Public Notice: 1/13/2021

Permit No.: 937095  
Tax Credit: n/a

Staff: Dan Bruechert

Proposal: Install a bike path with associated site improvements, railings, signage, and lighting, and to reconfigure the existing parking lot.

STAFF RECOMMENDATION

☑ Approve

☐ Approve with conditions

ARCHITECTURAL DESCRIPTION

SIGNIFICANCE: Individually Listed Master Plan Site (Silver Spring B & O Railroad Station #36/15)

STYLE: Colonial Revival

DATE: 1945

Figure 1: 8100 Georgia Ave.
PROPOSAL

A portion of the new Metropolitan Branch Trail will run through the site. This includes a 10’ (ten-foot) trail, signage, railings, and lighting. Additionally, the applicant proposes to reconfigure the existing parking lot, which will result in a loss of one parking space.

The proposal was reviewed and approved by the Maryland Historical Trust Easement Committee.

APPLICABLE GUIDELINES

Policy On Use of Expedited Staff Reports for Simple HAWP Cases

IV. The Expedited Staff Report format may be used on the following type of cases:

1. Alterations to properties on which the Maryland Historical Trust (MHT) holds an easement and which have been reviewed and approved by the MHT Easement Committee.

2. Modifications to a property, which do not significantly alter its visual character.

Montgomery County Code; Chapter 24A-8

(b) The commission shall instruct the director to issue a permit, or issue a permit subject to such conditions as are found to be necessary to ensure conformity with the purposes and requirements of this chapter, if it finds that:

1. The proposal will not substantially alter the exterior features of an historic site or historic resource within an historic district; or

2. The proposal is compatible in character and nature with the historical, archeological, architectural or cultural features of the historic site or the historic district in which an historic resource is located and would not be detrimental thereto or to the achievement of the purposes of this chapter; or

Secretary of Interior’s Standards for Rehabilitation

The Secretary of the Interior defines rehabilitation as “the act or process of making possible a compatible use for a property through repair, alterations, and additions while preserving those portions or features, which convey its historical, cultural, or architectural values.” The relevant Standards are as follows:

2. The historic character of a property shall be retained and preserved. The removal of historic materials or alteration of features and spaces that characterize a property shall be avoided.

STAFF RECOMMENDATION

Staff recommends that the Commission approve the HAWP application under the Criteria for Issuance in Chapter 24A-8(b)(1) and (2), having found that the proposal will not substantially alter the exterior features of the historic resource and is compatible in character with the district and the purposes of Chapter 24A;

and with the Secretary of the Interior’s Standards for Rehabilitation #2;

and with the general condition that the applicant shall present the 3 permit sets of drawings, if applicable, to Historic Preservation Commission (HPC) staff for review and stamping prior to submission for the Montgomery County Department of Permitting Services (DPS) building permits;
and with the general condition that final project design details, not specifically delineated by the Commission, shall be approved by HPC staff or brought back to the Commission as a revised HAWP application at staff’s discretion;

and with the general condition that the applicant shall notify the Historic Preservation Staff if they propose to make any alterations to the approved plans. Once the work is completed the applicant will contact the staff person assigned to this application at 301-563-3400 or dan.bruechert@montgomeryplanning.org to schedule a follow-up site visit. visit.

Description of Property: Please describe the building and surrounding environment. Include information on significant structures, landscape features, or other significant features of the property:

The Silver Spring B&O Railroad Station is located at the southern end of Montgomery County, a stop on the B&O's Metropolitan Branch that offered service between Washington DC and Point of Rocks in Frederick County starting in 1873. The original station on this site, built in 1878, was one of four first-class brick depots on this line. By 1936, when Silver Spring became a primary stop for passenger trains traveling from Washington to the Mid-West, the town had grown to accommodate new residential and commercial developments as well as increased automobile traffic. Heavier railroad usage during World War II helped spur replacement of the Victorian depot with a Colonial Revival design meant to evoke patriotism and the mid-20th century. The tunnel under the tracks opened in 1945, and the railroad bridge across Georgia Avenue dates from 1948. This station was in operation from December 1945 until February 1997. MPI took title to the damaged and neglected building the following year, restored it to opening day appearance, and (with Silver Spring Historical Society) launched a community gathering place and museum in 2002. The property is designated in the Montgomery County Master Plan for Historic Preservation and listed in the National Register of Historic Places for its historic and architectural significance.

The Silver Spring station is L-shaped with a hip roof, squared on the north corner by a smaller square flat-roofed block. Overall the building is 5 bays x 5 bays, with a projecting canopy on the southwest (track-side) facade and 2,250 s/f in size. The red brick building sits on a concrete base and features limestone trim and minimal architectural detailing. The slate roof, Flemish bond brick, walls, windows, floor plan, waiting room furniture, light fixtures, ticket office desks, master clock, telephone booth, lockers, display boards and signs are all original. Over the years, MPI has added other B&O fixtures. The Maryland Historical Trust holds exterior and interior easements for the building and grounds.

The environmental setting of the station today is 11,750 s/f (0.2697 acres) of land, much of which currently is an asphalt parking area. On the southeast sides of the building is a raised asphalt area bordered by a curb. Farther to the east is a red pipe railing that runs along the top of the retaining wall separating the station parking lot and busy Georgia Avenue. To the north of the station are two more recent 4-story buildings, Montgomery County Silver Spring Fire Station No. 1 and Progress Place. To access the existing B&O station parking lot, all vehicles must enter through the Fire Station and Progress Place parking lots. Except for a few trees that will be preserved, the small site does not current have any landscaping features.

Description of Work Proposed: Please give an overview of the work to be undertaken:

The proposed work at Silver Spring B&O Railroad Station site includes the construction of the 10'-wide Metropolitan Branch Trail along the north and east sides of the property. The shared-use path will connect to the existing trail on the north side of the property, continue along the north side of the property between the B&O Station parking lot and the fire station parking lot, turn toward the south and continues along the east side of the property between the B&O station parking lot between and Georgia Avenue, and then connect to the proposed pedestrian bridge over Georgia Avenue. The proposed design provides parking for five (5) vehicles. The proposed parking spaces are parallel to the shared-use path and measure 20'-0" long and 8'-0" wide. The shared-use path will be separated from the parking lot by a 2' trail shoulder and a curb & gutter. The curb will vary in height from 8" to 2'-0". Approaching the Georgia Avenue bridge, a bicycle railing will also be installed between the shared-use path and the parking lot. New perennials and ground cover will be installed along the shoulders of the shared-use path. After construction of the shared-use path and the Georgia Avenue pedestrian bridge is complete, the top 2" of asphalt on the B&O Station parking lot will be removed and the parking lot will receive 2" of new surface asphalt pavement. Two rails will be installed in the pavement at the entrance to the Silver Spring B&O Railroad Station parking lot. The rails will be bordered by brick-pavers with brick-pavers between the rails. The existing curb and platform area on the southeast side of the B&O Railroad Station building will be modified at a later date by MPI in order to accommodate adequate parking. Two possible configurations are shown in the attached Exhibit A.

The proposed lighting design includes one (1) new 80-watt LED Washington Globe Hard-Top luminaire on the B&O station property. Trail crossing signs will be installed where the shared-use path crosses the entrance into the B&O Railroad Station parking lot. Trail wayfinding, trail mile markers, and trail warning signs will also be installed in the vicinity of the B&O Railroad Station. At approximately station 114+00 left, a Silver Spring Heritage sign will be installed in the shoulder area of the trail. In addition to the new signs, a miniature flashing light signal and cross buck will be installed on the north side of the trail crossing at the entrance into the Silver Spring B&O Railroad station parking lot. Another proposed feature is a vintage B&O Railroad color position signal has been salvaged and is currently being stored on the Silver Spring B&O Railroad station property. The color position signal will be installed next to the existing ADA ramp. As noted in Exhibit B, the Maryland Historical Trust (MHT) Easement Committee has reviewed the proposed improvements and granted full approval for all proposed improvements to the Silver Spring B&O Railroad Station.
### Work Item 1: Parking Lot/Shared-Use Path

#### Description of Current Condition:

The existing Silver Spring B&O Railroad Station parking lot provides parking for thirteen (13) vehicles. The existing parking spaces are perpendicular to Georgia Avenue and measure 17'-0" deep and 8'-6" wide. The existing parking lot surface is asphalt and is in fair condition. See photos 1 and 2.

#### Proposed Work:

The proposed design modifies the Silver Spring B&O Railroad Station parking lot to accommodate a 10'-wide shared-use path. The proposed design provides parking for five (5) vehicles. The proposed parking spaces are parallel to the shared-use path and measure 20'-0" long and 8'-0" wide. The shared-use path will be separated from the parking lot by a 2' trail shoulder and a curb & gutter. The curb will vary in height from 8" to 2'-0". Approaching the Georgia Avenue bridge, a bicycle railing will also be installed between the shared-use path and the parking lot. New perennials and ground cover will be installed along the shoulders of the shared-use path. After construction of the shared-use path and the Georgia Avenue pedestrian bridge is complete, the top 2" of asphalt on the B&O Station parking lot will be removed and the parking lot will receive 2" of new surface asphalt pavement. The existing storm drain inlet in the parking lot will be protected from sediment and debris during construction to ensure that the inlet will function properly throughout the duration of construction. Two rails will be installed in the pavement at the entrance to the Silver Spring B&O Railroad Station parking lot. The rails will be bordered by brick pavers with brick paver between the rails as shown on Sheet 9. The future condition will visually match the entrance prior to the construction of Progress Place as shown in Photo 3. The existing curb and platform area on the southeast side of the B&O Railroad Station (shown in Photos 4 and 5) building will be modified at a later date by MPI in order to accommodate adequate parking. Two possible configurations are shown in the attached Exhibit A.

### Work Item 2: Georgia Avenue Pedestrian Bridge

#### Description of Current Condition:

The existing pedestrian bridge over Georgia Avenue is in fair condition. See photos 10 through 12. It was determined that the exiting structure (Br. No. 15078) does not have excess load capacity to handle a widening of the sidewalk by further cantilevering off the of existing exterior through girder. Therefore, a completely independent pedestrian bridge structure is proposed for the crossing of the Metropolitan Branch Trail over Georgia Avenue (US 29).

#### Proposed Work:

The proposed pedestrian bridge over Georgia Avenue is a new two (2) span through girder bridge (approximately 200’ long) supported on a pier in the median of Georgia Avenue. The structure will be installed over US 29 (Georgia Avenue) parallel to the WMATA/CSXT tracks supported on new cast-in-place abutments and a micropile supported pier. There will be an 8’ tall ornamental fence and a steel handrail along both sides of the bridge structure. The existing abutment and stairs on the west side of Georgia Avenue will be modified as shown on the plans.
Work Item 3: Signing and Lighting

Description of Current Condition:
The existing signing and lighting at the Silver Spring B&O Railroad Station will remain undisturbed.

Proposed Work:
The proposed design includes one (1) new 80-watt LED Washington Globe Hard-Top luminaire on a Silver Spring Decorative Pole to be installed adjacent to the trail on the B&O Railroad Station property. Additional Washington Globe lights will be installed in the vicinity of the B&O station. The decorative pole height will be 13'-2". Photo 6 shows the same style poles and luminaires that were installed along Phase 1 of the Metropolitan Branch Trail. Trail crossing signs will be installed where the shared-use path crosses the entrance into the B&O Railroad Station parking lot. Photo 7 shows the trail crossing signs that will be used. Trail wayfinding, trail mile markers, and trail warning signs will also be installed in the vicinity of the B&O Railroad Station. At approximately station 114+00 left, a Silver Spring Heritage sign will be installed in the shoulder area of the trail. Photo 8 shows a similar Silver Spring Heritage Sign. The design of the Silver Spring Heritage sign and post will be coordinated with the MPI and the Silver Spring Historical Society. Similar to the example in photo 9, green paint will be used where the shared-use path crosses the entrance into the B&O Railroad Station parking lot. The green colored pavement will increase safety for pedestrians and bicyclists at the crossing.

Work Item 4: Color Position Signal and Flashing Light Signal and Cross Buck

Description of Current Condition: N/A Does not exist

Proposed Work:
A vintage B&O Railroad color position signal has been salvaged and is currently being stored on the Silver Spring B&O Railroad station property (see photo 13). The color position signal will be installed next to the existing ADA ramp shown in photos 14 and 15. Underground conduit and wiring will be installed from the Silver Spring B&O station to the vintage color position signal and the lights will be restored to be fully operational. A miniature flashing light signal and cross buck will be installed on the north side of the trail crossing at the entrance into the Silver Spring B&O Railroad station parking lot. The flashing light signal and cross buck will be installed on right side of the B&O station entrance shown in photo 16. Photo 17 shows a similar miniature flashing light signal and cross buck.

Re: Silver Spring B&O Railroad Station, Montgomery County – Change/Alteration  
Maryland Historical Trust Preservation Easement

Dear Ms. McGuckian:

The Maryland Historical Trust (MHT) is in receipt of your additional information, received on October 8, 2020, submitted in response to my September 3, 2020 Director’s letter. MHT’s Easement Committee (Committee) reviewed the information on October 20, 2020.

Based on the review and recommendation of the Committee, I have determined that the architectural renderings of the bike path and site improvements are sufficient to satisfy the conditions of conceptual approval granted in my September 3rd letter. Therefore, I grant full approval of the request to install a bike path with associated site improvements, railings, signage, and lighting, and to reconfigure the existing parking lot at the Silver Spring B&O Railroad Station. This work is consistent with the Secretary of the Interior’s Standards for the Treatment of Historic Properties, General Rehabilitation Standards 8 and 9.

This approval is valid for a period of six months from the date of this letter. Should you require additional time to complete the project, make any changes to the scope of work as approved, or have any questions regarding this letter, please contact Casey DeHaven, Easement Administrator at (410) 697-9545 or by email at casey.dehaven@maryland.gov.

Sincerely,

Elizabeth Hughes  
Director  
Maryland Historical Trust
