

The Great Seneca Plan

CONNECTING LIFE AND SCIENCE

The Great Seneca Plan: Connecting Life and Science is an effort to examine the Great Seneca community, to identify strengths and needs and to create vision for the future.

Through our work, Montgomery Planning will evaluate how the area has grown over the past decade, consider current trends, and create recommendations to guide future growth with a focus on equity, sustainability, and transportation and community connections.

We look forward to working with you to expand our thriving, dynamic community for residents, workers, and business owners.

The planning process is centered on conversations and collaborations with the community to envision a shared future of equitable prosperity for a vibrant, diverse, and innovative region. We look forward to exploring how to create a unique sense of place—where industry, residents, and more can all contribute. Working together with you, we will begin building a Great Seneca that integrates diverse elements into a complete community and anticipates the changes to come.

To make that happen, we need to hear from you. Our engagement process will involve opportunities to weigh in virtually and in-person, as well as to contribute your ideas as the Montgomery Planning team develops long-term recommendations.
