

MONTGOMERY COUNTY HISTORIC PRESERVATION COMMISSION
STAFF REPORT

Address:	2115 Salisbury Road, Silver Spring	Meeting Date:	1/11/2023
Resource:	Contributing Resource (Linden Lane Historic District)	Report Date:	1/4/2023
Applicant:	Brett Howard	Public Notice:	12/28/2022
Review:	HAWP	Staff:	Dan Bruechert
Case Number:	1016142	Tax Credit:	N/A
PROPOSAL:	Accessory Dwelling Unit Construction		

STAFF RECOMMENDATION:

Staff recommends that the HPC **approve with one (1) condition** the HAWP application:

1. The windows need to have simulated divided lites with interior spacer bars (SDLS). Final submitted documentation needs to reflect this condition and approval documents will not be released until this condition is satisfied.

ARCHITECTURAL DESCRIPTION:

SIGNIFICANCE: Contributing Resource to the Linden Lane Historic District
STYLE: Queen Anne
DATE: 1906

Figure 1: The subject property is located on a double-width lot, with a deep front yard setback and with the historic house located near to the rear property line.

BACKGROUND

On February 2, 2022, by consent, the HPC approved an ADU at the subject property in the proposed location.¹ The applicants were unable to find a builder who could construct the ADU within the owners' budget, and so the applicants have returned with this revised proposal.

PROPOSAL

The applicant proposes to construct an accessory dwelling unit in the northwest corner of the lot.

APPLICABLE GUIDELINES:

When reviewing alterations and new construction within the Linden Lane Historic District several documents are to be utilized as guidelines to assist the Commission in developing their decision. These documents include *Montgomery County Code Chapter 24A (Chapter 24A)*, and *the Secretary of the Interior's Standards for Rehabilitation (Standards)*. The pertinent information in these documents is outlined below.

Montgomery County Code; Chapter 24A-8

- (b) The commission shall instruct the director to issue a permit, or issue a permit subject to such conditions as are found to be necessary to ensure conformity with the purposes and requirements of this chapter, if it finds that:
 - (1) The proposal will not substantially alter the exterior features of an historic site or historic resource within an historic district; or
 - (2) The proposal is compatible in character and nature with the historical, archeological, architectural or cultural features of the historic site or the historic district in which an historic resource is located and would not be detrimental thereto or to the achievement of the purposes of this chapter; or
- (d) In the case of an application for work on an historic resource located within an historic district, the commission shall be lenient in its judgment of plans for structures of little historical or design historic or architectural value of surrounding historic resources or would impair the character of the historic district. (Ord. No. 9-4, § 1; Ord. No. 11-59.)

Secretary of the Interior's Standards for Rehabilitation

- 2. The historic character of a property shall be retained and preserved. The removal of historic materials or alteration of features and spaces that characterize a property shall be avoided.
- 9. New additions, exterior alterations, or related new construction will not destroy historic materials, features, and spatial relationships that characterize the property. The new work shall be differentiated from the old and will be compatible with the historic materials, features, size, scale and proportions, and massing to protect the integrity of the property and its environment.
- 10. New additions and adjacent or related new construction will be undertaken in such a manner that, if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.

¹ The Staff Report for the previous HAWP is available here: <https://montgomeryplanning.org/wp-content/uploads/2022/01/I.C-2115-Salisbury-Road-Silver-Spring-951746.pdf>.

STAFF DISCUSSION

The applicant proposes to construct an accessory dwelling unit (ADU) on site. The proposed building will be placed to the left of the historic house near the location of the existing non-historic shed. The two-story structure measures 26' x 17' (twenty-six feet deep by seventeen feet wide) and is 21' 6 1/2" (twenty-one feet, six and one-half inches) tall. The structure draws from Craftsman architectural forms, with its front gable roof with left and right shed dormers. The exterior of the ADU is sided in fiber cement clapboards, Marvin Elevate (fiberglass clad wood) windows, and Heritage fiberglass doors. The rear and left (west) elevations, which face outside the property have fewer windows than the front and right elevations.

Staff finds the size of the proposed ADU is compatible with the character of the site and surrounding district. Because the house is on a double-wide lot, near the rear property boundary, any ADU necessarily will be to the side of the house and visible from the public right of way. Staff also notes that the subject property is surrounded by Non-Contributing Resources constructed after the 1955 lot subdivision. The properties to the north are outside of the historic district boundaries.

Figure 2: 1955 Plat subdividing the subject property (now lot 28) into ten residential lots.

Staff finds the design of the ADU draws from a traditional architectural vocabulary with a rectangular form with a simple covered stoop oriented towards the front, principal front gable roof, and shed dormers. The 6/1 sash windows are consistent with both Craftsman and Colonial Revival architecture.

The materials used are generally consistent with the HPC's guidance for new construction and accessory structures in historic districts including fiber cement siding walls and trim and architectural shingle roofing. The two architectural features that require more analysis are the proposed doors and windows,

which both have fiberglass exteriors. Staff finds the fiberglass door is appropriate in this location for two primary reasons. First, as an accessory structure application of the standards and guidelines are granted wider latitude, because it will not impact historic fabric. Second, Staff finds because the proposed door is a full-lite door, the configuration leaves little of the door frame exposed reducing the material's visual impact.

The proposed windows are identified as Marvin Elevate in a mostly 6/1 sash configuration. Detailed specifications for these windows were not included in the application materials; however, Staff was able to review the proposed window on the manufacturer's website:

<https://www.marvin.com/products/collections/elevate/double-hung-insert>. The windows have a fiberglass exterior which has more depth than a vinyl window, but less than a wood or aluminum-clad window, with a wood interior. This window series offers three different methods for simulated divided lites: grilles between the glass, simulated divided lite, and simulated divided lite with a spacer bar. As with the door, Staff finds the material is appropriate in this application (i.e. a detached contemporary accessory structure) while it would not be appropriate on the historic house. Staff finds the proposed 6/1 configuration is appropriate provided the windows are divided using the simulated divided lite with an interior spacer bar (Staff also notes that Marvin Elevate windows were the approved window in the 2022 HAWP). This configuration creates visual depth and shadow lines that are more consistent with the appearance of the surrounding district.

The previous proposal included a flagstone patio; however, no information was submitted with this HAWP. Any additional hardscaping will require a separate HAWP.

No trees are in the area proposed for the ADU. If the limits of disturbance need to be expanded during the building permit review, the applicant must return to the HPC for any necessary tree removals. However, the new building will be constructed in the area that is already used for on site parking and it is not anticipated that trees will need to be removed.

STAFF RECOMMENDATION

Staff recommends that the Commission **approve with one condition** the HAWP application:

1. The windows need to have simulated divided lites with interior spacer bars (SDLS). Final submitted documentation needs to reflect this condition and approval documents will not be released until this condition is satisfied;

under the Criteria for Issuance in Chapter 24A-8(b)(1), (2), and (d), having found that the proposal is compatible in character with the district and the purposes of Chapter 24A;

and with the *Secretary of the Interior's Standards for Rehabilitation* #2, #9, and #10;

and with the general condition that the applicant shall present an electronic set of drawings, if applicable, to Historic Preservation Commission (HPC) staff for review and stamping prior to submission for the Montgomery County Department of Permitting Services (DPS) building permits;

and with the general condition that final project design details, not specifically delineated by the Commission, shall be approved by HPC staff or brought back to the Commission as a revised HAWP application at staff's discretion;

and with the general condition that the applicant shall notify the Historic Preservation Staff if they propose to make **any alterations** to the approved plans. Once the work is completed the applicant will contact the staff person assigned to this application at 301-563-3400 or dan.bruechert@montgomeryplanning.org to schedule a follow-up site visit.

PROPOSAL:	Accessory Dwelling Unit Construction		

STAFF RECOMMENDATION:

Staff recommends that the HPC **approve** the HAWP application.

ARCHITECTURAL DESCRIPTION:

SIGNIFICANCE: Contributing Resource to the Linden Lane Historic District
STYLE: Queen Anne
DATE: 1906

PROPOSAL

The applicant proposes to construct an accessory dwelling unit in the northwest corner of the lot.

APPLICABLE GUIDELINES:

When reviewing alterations and new construction within the Linden Lane Historic District several documents are to be utilized as guidelines to assist the Commission in developing their decision. These documents include *Montgomery County Code Chapter 24A (Chapter 24A)*, and *the Secretary of the Interior's Standards for Rehabilitation (Standards)*. The pertinent information in these documents is outlined below.

Montgomery County Code; Chapter 24A-8

- (b) The commission shall instruct the director to issue a permit, or issue a permit subject to such conditions as are found to be necessary to ensure conformity with the purposes and requirements of this chapter, if it finds that:
 - (1) The proposal will not substantially alter the exterior features of an historic site or historic resource within an historic district; or
 - (2) The proposal is compatible in character and nature with the historical, archeological, architectural or cultural features of the historic site or the historic district in which an historic resource is located and would not be detrimental thereto or to the achievement of the purposes of this chapter; or
- (d) In the case of an application for work on an historic resource located within an historic district, the commission shall be lenient in its judgment of plans for structures of little historical or design historic or architectural value of surrounding historic resources or would impair the character of the historic district. (Ord. No. 9-4, § 1; Ord. No. 11-59.)

Secretary of the Interior's Standards for Rehabilitation

- 2. The historic character of a property shall be retained and preserved. The removal of historic materials or alteration of features and spaces that characterize a property shall be avoided.
- 9. New additions, exterior alterations, or related new construction will not destroy historic materials, features, and spatial relationships that characterize the property. The new work shall be differentiated from the old and will be compatible with the historic materials, features, size, scale and proportions, and massing to protect the integrity of the property and its environment.
- 10. New additions and adjacent or related new construction will be undertaken in such a manner that, if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.

STAFF DISCUSSION

The applicant proposes to construct an accessory dwelling unit (ADU) on site. The proposed building will be placed to the left of the historic house near the location of the existing non-historic shed. The ADU has the form and approximate size of a two-car, 1-and-a-half story garage, and measures 20' (twenty feet) tall, with a footprint of 26' × 23' (twenty-six feet by twenty-three feet). The proposed ADU will be placed 17' (seventeen feet) from the north and west property lines.

To match some architectural details of the historic house, the ADU will utilize two different types of cedar siding. The first floor and much of the second story will be covered in beveled clapboards. The shed dormers will be covered in cedar shingles. The proposed gable roof with shed dormers will be

covered in three-tab shingles to match the roof of the historic house. The applicant proposes to install Marvin Element composite windows and doors. The windows will be a mix of multi-lite casement and six-over-one sash windows. The proposed doors are fifteen-lite French doors.

At the rear of the proposed building, the applicant proposes to construct a flagstone on-grade patio. The patio will not be visible from the right-of-way.

Staff finds the location of the proposed ADU is compatible with the site and surrounding district. While it may be preferable for the new building to be to the rear of the historic house, that is not feasible on this site, which is wider than it is deep.

Staff finds that the traditional design of the proposed ADU, with its rectangular form, gable roof, and multi-lite windows is compatible with the surrounding Linden Lane Historic District and the subject property. Staff additionally finds the materials used including wood siding and asphalt shingles are compatible with the site and surrounding district. The one material that requires additional analysis is the proposed Marvin Elevate Windows and Doors. These have a fiberglass exterior and a wood interior. The window profile is thicker than a vinyl window and closer to the dimensions of an aluminum-clad window. Staff finds that the proposed windows and doors are appropriate for an accessory structure, which typically have lower levels of finish than the primary residence. Staff finds the proposed ADU should be approved under 24A-8(b)(1) and Standards 2, 9, and 10.

Staff finds the proposed flagstone patio is compatible with the site, but should be approved as a matter of course as it will not be visible from the public right-of-way.

No trees are proposed for removal with this project and none are shown within the proposed footprint of the new construction. If the limits of disturbance need to be expanded during building permit review, the applicant must return to the HPC for any necessary tree removals. However, the new building will be constructed in the area that is already used for on site parking and it is not anticipated that trees will need to be removed.

STAFF RECOMMENDATION

Staff recommends that the Commission **approve** the HAWP application under the Criteria for Issuance in Chapter 24A-8(b)(1), (2), and (d), having found that the proposal is compatible in character with the district and the purposes of Chapter 24A;

and with the *Secretary of the Interior's Standards for Rehabilitation #2, #9, and #10*;

and with the general condition that the applicant shall present an electronic set of drawings, if applicable, to Historic Preservation Commission (HPC) staff for review and stamping prior to submission for the Montgomery County Department of Permitting Services (DPS) building permits;

and with the general condition that final project design details, not specifically delineated by the Commission, shall be approved by HPC staff or brought back to the Commission as a revised HAWP application at staff's discretion;

and with the general condition that the applicant shall notify the Historic Preservation Staff if they propose to make **any alterations** to the approved plans. Once the work is completed the applicant will contact the staff person assigned to this application at 301-563-3400 or dan.bruechert@montgomeryplanning.org to schedule a follow-up site visit.

Description of Property: Please describe the building and surrounding environment. Include information on significant structures, landscape features, or other significant features of the property:

This large Colonial Revival-style dwelling, built about 1907, replaced an earlier house destroyed by fire the same year. Strict bilateral symmetry of the front facade is relieved by a wrap-around porch anchored with a pediment over the central entrance. Paired windows on first and second stories are characterized by a diamond motif in the upper sash, a pattern echoed in both the dormer windows and the oculus above the front entry.

Description of Work Proposed: Please give an overview of the work to be undertaken:

Construction comprises a carriage house adjacent to the primary residence, with both to be joined by a common driveway leading up from Salsbury rd.

Work Item 1: Carriage House

Description of Current Condition: N/A

Proposed Work: New construction from existing gravel driveway. Construction will include foundation, connecting to utilities, and all structural elements of the carriage house.

The 2x6 exterior with spray foam insulation and mini-split heating and cooling provides exceptional energy performance. This model qualifies for all Arlington residential lots.

MARVIN SIGNATURE[®] ULTIMATE

Choose from any divided lite option, either authentic or simulated, with or without spacer bar or grilles between the glass for a smooth surface and easy cleaning.

When it comes to patterns, we can create almost any divided lite pattern—including combinations of widths, unique profiles, rectangular or curved cuts and more. Choose from an existing lite cut, specify custom divided lites according to a new design or ask our design professionals to assist in creating a pattern for your project.

Selected: Custom Pattern

**These are some of our most frequently-requested divided-lite patterns.*
