

bethesda crescent

SK+I ARCHITECTURE | MRP | REALTY

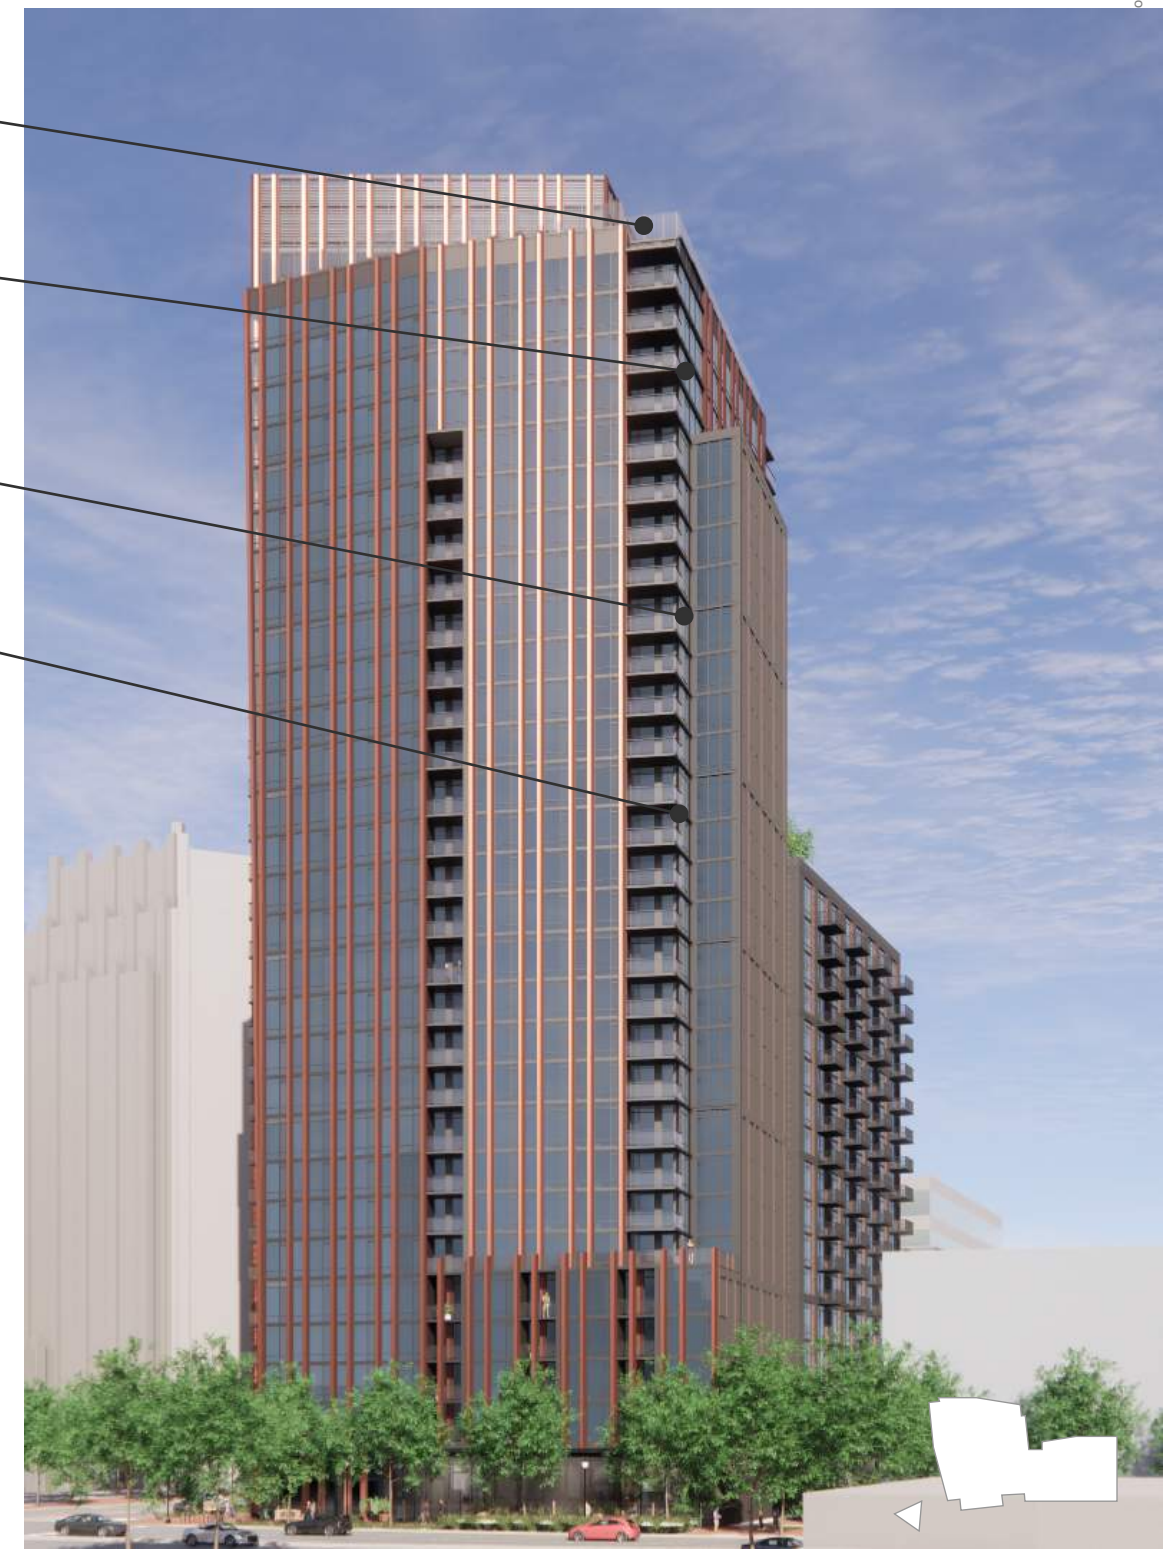

Parapet above balcony stack recessed back from main Wisconsin facade, establishing a clear separation from the folded plane.

Top 4 floor corner windows enlarged with one more bay of copper piers removed, enhancing the top reading of the tower approaching from south.

Copper Piers removed, corner windows enlarged and set back, slab edges are pronounced for a more dramatic reading. Same condition is established on the southeast corner of the building.

Corner Pier and Wingwall removed

1 View from Northwest (Metro Plaza)

2 View from Southwest (Metro Plaza)
